The Campelling Papers Secondar of the Audit Stormer of Cappelline

Here Is a Real Issue

T. C. Douglas, leader of the New Democratic Party, says that Canadians should make a massive effort to regain control of the country's economy from foreign investors.

Here Mr. Douglas has touched a point which could become a major issue in the present federal election campaign, if the different parties would resent practical proposals for achieving a result

unfortunately, Mr. Douglas is not so helpful in his suggestions as to how this can be achieved. He declares that Canadians must open their wallets. This has the merit of calling for greater investment by Canadians in the developgreater investment by Canadians in the develop-ment of their own country. Unfortunately, this merit seems to us to be more than offset by the implied augustion that the problem can be solved merely by loosening our purse strings. This is highly questionable. Canada has become so dependent on foreign capital because there is not enough domestic capital. Much of this one country of the control of the country of the other country of the would involve not merely loosening purse-strings but also tightening belia.

would involve not merely loosening purse-strings but also tightening belia.

One of our difficulties is that most of the foreign investors who have financed our pat development have gambled and won. Their past investments are going to produce more capital, which will be largely the product of the utilizaof our natural resources and our manpower, which will still be "foreign capital." We out which will still be "foreign capital." We could, if we wished, make it difficult for this capital to return home, in other words we could require that profits should be invested in this ry. That, however, would do nothing to ce the proportion of our economy which anadian-owned. country.

was Canadian-owned.

There is one remedy, but it is not a remedy which most Canadians would like to see used. This is nationalisation. It would be a two-adject sword, as it would be certain to cut us off from further foreign investment, which even Mr. Douglas admits we need. Some poverly-stricken countries may have to use it as a last resort. Mr. Douglas himself heads the successor of a party which once forthrightly favored extensive also of domestically-owned industries. Even he, though, appears to be anxious to use this means as sparingly as possible—"if we can restore control of the economy to the Canadian people without nationalization, then we don't need nationalization.

Short of nationalization, the cure is likely to be painful. It would probably involve a sharp curtailment in income and corporation taxation—and therefore in the services which these taxes provide. On the other hand, there would need to be very stiff luxury taxes, on would need to be very stiff luxury taxes, on all but the chespest cars, no hoats and molors and on hi-fi sets, etc. Canadians would have to content themselves with their present housing and the vast sums invested by insurance com-panies and trust companies in this field would passed and trust companies to the com-panies and trust companies on the com-panies and trust companies to the com-panies to the companies of the com-panies to the companies of the com-panies to the companies of the com-panies of the companies of the com-tant companies of the com-tant companies of the com-tant companies of the com-tant companies of the companies of the com-tant companies of the companies of the com-tant companies of the com-tant companies of the companies of the companies of the com-tant companies of the companies of the companies of the com-tant companies of the companies of Canadians would have to work at wages would enable us to sell our products

If all this were done, eventually Canadians might own Canada once again. But this pro-gram is a lot different from merely opening our

Spring cleaning and the subject of manners may seem poles
apart, but there is a connecting
link. Some homemakers work
themselves into such a fremy
over the-semi-annual sweep out
that they are apt to become a
trifle inconsiderate of family and
a selection like.

ritle inconsiderate of family of an eligibors alike.

When you drive yourself to a grazule over fresh curtains and of lipcovers, sometimes you are paything but your usual sweet, sharming, good-natured self. 5 the family often ends up get-sing the short end of the barrial and the long end of the

stick.
Planning now for the annual
war against dust and clutter can
save everyone from displays of
temper and bad manners. Instead of doing the job in one
grand push, try to organize
things so that you tackle one
chore at a time - with breathing space in between.

For instance, now is a good time to attack overstuffed closets and drawers. If your household is anything like mine, taltered Fall playclother and a goodly percentage of the Winter things can be tossed out now. With four children constantly putting knees and elbo ws through slacks and sweaters, very few items can be repaired, and they're not going to look

of hours without a wrinkle of the nose. A few paint projects could be completed well in advance of the final Spring cleaning push.

Spring cleaning used to be a hazardous time for the whole

There is, however, only cold confort in this kind of speculation. If the technique is ever developed, we suspect it will be for space flights. Then, if the space traveller does not run into the arms of Venus, which we have just learned the arms of Venus, which we have just learned is running a temperature of 800 degrees Fahrenheit, he can return to earth after 10,000 years and report: "As I was saying to your great, great, great great, great -" And die of old age before he has established his generation of

Electric heating eliminates the flame: raises the standard of home heating safety

LECTRIC heating is a safety breakthrough in home L heating because it does not use flammable fuel of any kind—it is completely flameless.

When the weather gets cool (at any time of year) you just dial the heat you want. At once, your home is heated directly with electricity through built-in units in each room and area. Thousands of Ontario home owners now have electric heat-ing and conservative estimates indicate that this number will have increased five times by 1965.

ELECTRIC HEATING REVOLUTIONIZES MODERN LIVING

Only electric heating gives you custo can dial exactly and precisely the temperature you want for any room in the house. That's because electric heating offers you a thermostat in every room. The air is more healthful with electric heating—never dry or stifling.

Electric heat is gentle and constant. There are never any cold spots or uncomfortable blasts of hot air. You'll never be disturbed by noises-electric heating is the quietest heating system there is,

REDUCED OPERATING COSTS

In many municipalities the rate for electric heating has been reduced as much as 30% during the last two years. This means that in some areas it costs less to heat a home electrically than it does with other systems. In other places,

the cost is about the same. In the few areas where ra are still slightly higher, the difference is negligible compared to the extra value electric heating gives you.

The Electric Heating Association of Ontario will go the estimated annual heating cost of a home built to "Triple Seal of Quality" standards. The guarantee covers a full two-year period.

LOW INSTALLATION COST

Electric heating is easy to install. No furnace or fuel tank is required. And with electric heating there are no annual maintenance costs?

GUARANTEED INSTALLATION

Choose an electric heating contractor who is qualified to back his work with the industry recognized Triple Seal of Quality guarantee. This guarantee covers both equipment and insulation. Any home with electric heating should be built to Hydro standards of insulation.

THE LONG-TERM ECONOMY OF ELECTRIC HEATING PROVES THAT IF YOU ARE BUILDING OR BUYING A NEW HOME, WHATEVER THE SIZE, THERE IS NO REASON YOU SHOULD SETTLE FOR ANYTHING LESS THAN THE SAFETY, CUSTOM-COMFORT AND CLEANLINESS OF THE HEATING SYSTEM THAT IS REVOLUTIONIZING

For more information and estimates, contact your qualified electric heating contractor or your local Hydro office.

Some people know little about the parliantary system of government.

Apparently those people include Robert

Thompson says that he and deputy leader

This sounds like double talk. The explanation apparently is that the nuclear arms issue is not regarded by Mr. Thompson to be important enough to rank consideration in determining party policy.

Coming from an opposing team, which incidentally was the losing squad, the above is an outstanding tribute to the sportsmanship and ability of both the Scileville youngsters and their coach.

Coach Lee ReQualé is the principal of Queen Alexandra School. He halls from a well-known Prince Edward County family and has been associated with sport-since he tred the dusty byways to the little red school-house in the southern kinterland of "Little Spain."

In fact we were blood brothers in that tribe of bass ball "Spaniards" that went to the Ontario intermediat championship back in 1933 in the halcyon days of "Warpy Phillips and "Lefty" Goldsmith.

His knowledge of sport through participation and study and his years of association with boys through touching are two of the main factors of his success as a minor coach.

Coaching systems differ. Fundamentally perhaps there similarily but from there on the coach is practically on own. He has to figure out a common ground on which can bring to the same playing and sportamenthip level group of boys of varying dispositions and temperaments.

Lee summed up his system in four short words. "I talk to them."

But the "talk" covers a lot of ground. By this meetries to instil the spirit of sportsmanship, of playing but not at any cost.

He does not threaten nor cajole, nor does he want his players to "hack" out of a situation. "If you must fight," he tells them, "fight clean." Silck-swinging an opponent is strictly tabu in the McQuaid hockey mesage.

"I had a couple of fightungry pungaters who would swing a stick at the alightest provocation," he said. "I did not have three aid. "I did not have three stick." I did not have three stick. The said result from such action, but mainly I impressed upon them the fact that people, probably their parents, were watching."

There's a little bit of bad in every boy and a lot of dis the so-called bad ones. "I appeal to this part of its makeup and it works. The two stick-wingers are two of the best. They are id of their provocality shuffly ones to the work, they drop slick glores and go in there. But that does not occur too."

"I impress upon them the fact that because plot opposing teams resert to hooking, slashing, trip of opposing teams resert to hooking, slashing, trip of the new form the slash of the new form the new fact, slashing the new fact, and it is not never the new fact, and it is not never to them."

of them."
"I tell them," said Loo, "that team work is a g factor in success. A boy in the penalty box or ben became of behavior is no naset to the club. Indire he hurts his team as well as himself."

"And when we play out-of-town games I particularly mpress upon them that they are representing their city. want them to leave a good impression—win or loss—so hey will want us to come back some time."

"I have had a lot of luck, too," Lee told me, "but I find that talking to boys individually and collectively, pointing out the rights and wrongs, pres and cons, without being a stave-driver or Simon Legree has excellent points and brings results."

Growth of the Control to the

Education Week

This is Canadian Education Week. With the general aim of this annual observnce, interesting the public in the problems and needs of our educational system, we have the st sympathy.

Matching this sympathy with confidence in worthwhile results is often difficult, and never more so than this year, when the chosen theme for the Week is "How about Teaching? See How

interest in teaching, but the chances of its en-couraging young people to become teachers ap-pear to be slight. Surely the greatest, and decisive, influence in this field will be the day-lo-day experiences of these young people in the schools, as they get their own education, and the absolutions which they have with those who have already embraced teaching as their life-have already embraced teaching as their life-

work.

Most of the obstacles towards encouraging young people to become teachers appear to have been removed in recent years. By and large, teachers are no longer expected to observe Sparare no longer expected to observe Spar-idards of personal conduct against which tan standards of pe other segments of the community would rebel. Salaries have increased to a point which makes further increases inadvisable, for fear those with no liking for teaching might be attracted to it by

no liking for teaching might be attracted to it by acquisitive instincts alone.

What today's well-to-do teachers may lack is that prestige with which the profession was once cloaked, perhaps in a community effort to hide the niggardliness with which they were

paid.
At the risk of sounding helplessly old-fash-inned, we would suggest the best lure which the teaching profession neight dangle before young people is the challenge to devote their lives to a work which, if somirably performed, always leaves the society in the debt of the teacher, no matter what arrangements are made for maxi-mums, minimums and annual theorements.

mums, minimums and annual increments.

But this challenge is best extended by teachers, not by the general public and certainly not organizations like the Canadian Manufacturers' Association, the Canadian Table Association, the Canadian Labor Congress and many others of the 76 national organisations supporting the Canadian Education Week Com-

whether we will get enough dedicated teachers in the future, therefore, depends largely on whether we have enough dedicated teachers towhether we have enough dedicated teachers to-day. This is not an altogether unhappy situa-tion. While there may be some who have recently entered the profession because it today offers an opportunity to make a salary above the average, we doubt whether these number any higher percentage of the whole teaching in the salary of the total control of the salary of the salary of the national salary of the salary of the salary of the national salary of the salary of the salary of the salary case. In the teaching nordeston, more than year, case, in the teaching nordeston, more than easists way to be sure of a job of any kind. In any case, in the teaching profession, more than any other, a little leaven leaveneth a whole loof. All that is needed to inspire young people capable of being inspired is one teacher whose heart and soul, as well as mind and musel, are involved in teaching. There have always been enough of these in the past to supply the needed leaven— and we anticipate there always will be, except in and we anticipate there always will be, except in those small schools which are unfortunate enough to be staffed with teachers to match their size

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

Five years ago John Lewis, 15-year-old son of Mr. and Mrs. Peter Lewis of this city, decided to concentrate his sports efforts on hockey. He was big and husky for his age, physically a coach's dream as a defence-

He showed potential on skates. He stood out as a midget and juvenile player and was picked by a pro scout to attend a junior "A" school at Hamilton. There the hockey dream bubble burst. Along with others, Lewis was sent in the school of the "Don't call us-we'll call

The other day this 196-pound, 5-11 youngster who olds, with other marks, the junior middle-weight weight ting champlonship of the British Empire, was se-cted a member of the team which will represent Can-ia at the Pan-American games in Sao Paulo, Bratil.

Lewis was one of three lifters selected at the Pass a trials held in Montreal from a large immber of pirants from all parts of Canada. The others form: the team are Mike Lapari, and Pierre St. Jean, h from Quebec.

Ken Carr-Braint, Lewis' "life-long" coach, was one e mentors selected to coach the Canadian team. I Is honors went to the father of St. Jean.

"Mr. St. Jean is an outstanding coach," Lewis told me an interview, "but naturally I preferred to see Ken go ther all he has coached me to the top and I would have ed to see him selected. He has taught me all I know."

Lewis, by the way, is the first Belleville athlete named to a Canadian team in Pan-American Games Competition.

And the quiet, soft-spoken youngsier is taking his hon ors—and what they mean—in his stride. He seems not the least excited over a long air trip to Sao Paulo, the second largest city in Brazil, situated inland from the coast some distance south of Rio de Janeiro.

He does not appear to be disturbed over the fact he will be meeting opponents from many countries. He has no "stomach butterflies." A colorait world of travel—his first—which will open to him, does not bother

He is concentrating on his training. He works out the hours daily to bring himself to the peak of perfec-ts for the biggest test of his life.

"Barring accidents I will be in top shape," he said.

'I have never felt better in my life—and I'm very happy to represent Canada."

In his surge to the top John won four British impire junior championships. He holds the Canadian enfor "total" record of 910 pounds and the other day at a new Canadian "anatch" record of 230 pounds.

esides training, he works every day at manual in bed by 10 o'clock every night and gets sleep. He is on no special diel.

John has two brothers, Joe, 21, and Gary, 23, members of the Apollo Club. Joe is a lighthewith a total mark of 710. Garry is pretty good, "But," said John, with a smile, "they can't beat the brother."

John Wayne Lewis (he said his father and mother must have been watching television westerns "to give me a name like that") was married last August 4th and cheering kinn on will be his bride of less than a year, the former Sylvia Runhlow.

Despite various adverse comments and
criticisms about President Kennedy of the United
States there can be little doubt in any person's
mind that he is dedicated to vigorous and independent leadership and capable of making
swift decisions when he feels the interests of his
country are at stake.

This is certainly evident in his recent remarks about the newspaper strike in New York. To quote from his remarks:

To quote from his remarks:

"The situation has long since passed the point of public toleration—it is clear that the local of the International Typographical Union and its president, Bertram Powers, in so far as anyone can understand his position, are attempting to impose a settlement which could shut down several newspapers in New York and throw thousands out of work..."

A. A. Hutchinson, vice-president of the Order of Railtrad Telegraphers, says the CNR is assisting the Canadian Brotherhood of Railway, On Visit to Home Transport and General Workers to raid his gainer

union.

The CNR denies this.

Mr. Hutchinson says the CNR has made no secret of its derire to have an industrial union replace craft unions where possible, because it would like to see a reduction in the number of unions representing its employees.

We have seen nothing to indicate that the CNR has denied this.

So bystanders with a memory can enjoy a little chuckle.

little chuckle.
When Indistrial unions were being born on this continent, employers looked askance. There was much talk about the desirability of recognizing the particular skills required by different trades. But the aceptic might have been pardoned for wondering whether employers were not remembering the old technique, divides and rule.

Now, however, the obvious advantages of making a bargain with one union, which can speak for all employees, have made at least one organization, the CNR, change its policy.

How's that Again?

RARE, MEDIUM, WELL-DONE By GEO. H. CARVER, Sports Editor

A few weeks ago the Trail Smoke Enters en-routs to Slockholm and the world bockey championships were being trodden or skated underfoot by clobs a little better than intermediate calibre. The crowning defeat was administered by a team of untried college players gathered together for the event.

With the exception of the loyal faithful of the British Columbia mining town, the "hone" of world champions, critics and alleged hockey experts from all parts of the country beneased the fact Canada was sending a third-rate squad overseas to retrieve the world

. One Eastern Canada critic went so far as to say the 5mokles should be halted at Halifax after completing their exhibition tour and sent back to Trail.

Coach Bob Kromm of the Smokles took the home-country blasts in his stride. He did compilate that be had received no player-help co-operation from the powers-that-be but he hoped the situation would be adjusted.

Kromm let the major part of the blasts roll off his back like the well-known aque-pura off the duck and went shead according to plan. Unlike his critics Kromm knew his club and his player potential.

After all a club that whomped Western Cauada refeasional faams three or four times had some kind of bility even if they didn't produce it in competition tith the second-rate eastern amateur clubs.

The Smokles may have been playing pessum on their Canadian tour. Subsequent events prove that Krennm was whipping the club into shape, meanwhile penying for a little help from the native country.

The Snakies went oversees and their European enthilities four results caused a little crowathbling on the part of the critics hatch home. They was never out of ten games, ited one and lost a pair. Their crowning effort was the deteat of the Swedish national beam, current world champions, and favored—in Swedish was never the contract of the Swedish national beam, current world champions, and favored—in Swedish was as the Swedish was not seen the second to the s

control of the Smokles' losses came at the hands of the Crechoslovakian team picked by experts overseas in all the glory in Stockholm. Incidentally the experts name the Smokles to finish second with a and Sweden following in the order named.

Whating world championships is a tradition in Trall and a legend with the Smokies. Back in 1839 the Smokies of that year romped undereated through the world tourney winning eight straight to give Canada one of its 12 world bookey crowns... That was before Ranaia invented the servers

The Smekies, in the process almost made the series a complete shutout sweep. The opposition only scoree one goal—and Trail had to score it for the Crechs. A long abot from a Crech hit a Trail defenceman and ear omed into the goal.

The Smokies of that year were undisputably iron men They played in 55 games, including the tournament during a November-barreh jaunt and lost only one, a 3-5 decision to a gang of Canadians playing under the Wembley Lions

But the Smokies almost "lost out" on another Eur, opean manocurre. The team left Czechoslovakia a scani few days before a joker with eyes on a different sort of world title moved his "team" into "Sudechniand to provoke World War Two.

He was Casch Hitler of the Nati Castempilles.

The world games then were played on a rink with movable boards and players would periodically vault boards and suddenly return to the rink near the net.

The Smokles also had the amateur "Jacques Plante" of the era. He was Duke Scotaliers, a semadic goalle believed to be the first wandering keeper of the pipes. He was a fine stickhandler and with forechecking prescribedly unknown by the Emperains, he would set up plays in his own end of the rink.

Hon. Matthew B. Dymond, Ontario Minister of Health, says that as a young doctor he gave withdrawal drugs to addicts without realizing it was against the law, at the time.

was against the law, at the time.

Dr. Dymond made the admission in the Ontario Lagitalature, as he explained that the
Chatrio Laeolatem and Drug Addiction Research
Foundation is studying the possibility of treating
addicts by using diminishing doese of harcottle
drugs. An amendment to reteral legislation in
1801 has been hiersysted as allowing doctors to
employ this method.

Ther that the law gives the doctor the right

"Now that the law gives the doctor the right to do it, I can any it." Dr. Dymond said of his own unwitting infractions of the previous law. There are two ways to look at this. From the standpoint of the lawyer, we doubt whether the change in the law makes any material dif-ference in Dr. Dymond's situation. Ignorance of the law is not considered any cruuse, though it may be an extensiting circumstance when sentence is considered, and the same, we would imagine, would be true of any subsequent change in the law.

imagine, wound not true any subsequent canage in the law.

In the law true and the subsequent of the support of the hydrolical and the standpoint of the physician, rather than of the lawyer. Years ago Dr. Dymond treated addicts in a manner which, from the standpoint of his medical knowledge, he believed was appropriate. He was fortunate enough not to know that what he regarded as medically desirable was legally forbidden. Time, and the growth of knowledge, have resculed in the law being altered to permit use of this method.

Some may consider that Dr. Dymond deserves congratulations and his choice of treatment has been when the subsequent of the subseq

Education for Retarded

Hon. L. P. Cecile, Ontario Minister of Welfare, NDP Leader Donald C. MacDonald and James Trotter, M.L.A. for Parkdale, had a disagreement the other day. This is hardly news. agreement the other day. This is hardly news. It is their business to disagree. That is why they represent different political parties in the Ontario Legislature—to uphold differing theopolats on a variety of problems. As Mr. Ceclie remarked, "our philosophies differi." But not all their differences are as potentially helpful as

all their differences are as potentially helpful as the one to which we refer.

Mr. MacDonald directly, and Mr. Trotter by implication, advocated the assumption by public authorities of the full cost of educating mentally retarded children. Mr. Ceelle answered that the provincial, government's policy was to assist what is "really a community effort." The first essential in reaching a solution of an interest of the conditions would be suffered to the force of the sense of the conditions would be suffered be mentally the conditions would be suffered be suffered to the face of it seems sharp enough, may not

Unfortunately, the division of opinion, which on the face of it seems sharp enough, may not be quite so clear-cut. The observations were made at a meeting of the legislature's health and welfare committee, which approved a bill which would allow the province to pay 50 per cent, up to \$25.50 a bed, of the cost of constructing residential horizontal properties of the payment of half the net operating costs of privately-operated homes, set up by local associations.

Now there is nothing inconsistent about supporting Mr. Cecile in the contention that this porting Mr. Cecile in the contention where is as far as the province ought to go in providing housing for retarded children, and at the same time in endorsing the stand of Mr. MacDonald and Mr. Trotter that the full cost of educating retarded children should be met out of public

It does draw to our attention, though, that there may be some special considerations which should be noted before we make any decision with regard to strictly educational costs. In the first place, is, it possible to "educate" relarded children, in the sense in which we use the went "educated and the sense of the se It does draw to our attention, though, that

If it is possible to teach a retarded child

decisions it must reach.

The philosophies of Messrs. Ceclie, MacDonald and Trotter may differ, as do those of
the rest of us, but we feel super that basically

"Quite Fair"

Mentally retarded girls can make "quite fair" wives, if they don't have to care for too imany children, according to Dr. M. O. L. Barrie, superintendent of the Ontario Hospital in Co-

Now, all that is necessary is to find men sufficiently mentally retarded to settle for a product which is merely "quite fair" when they go looking for a wife.

It is high time, it seems to me, that a moral game-law were passed for the preservation of the wild and vagrant feelings of human nature.—

DEAR DORIS—Is it possible for an 18-year-old girt to like a boy two years younger, considering the fact that he mature for his age, and looks older?

The fact is that it bothers me the way people tease me, and say that lam "robbing the cradic."

Please answer this before anything develops—CONFUSED AND HOPING.

DEAR CONFUSED—Anything's possible; well, nearly anything. Is he tall for his age? In a higher grade than nont 18-year-1604? The oldest of a family?

If the answers are a recounding 'yest', he's out of the cradit. Otherwise, two years younger is a good deal for a boy, when you are in your teem.

DEAR DORIS—I am a girl 17, my sisters are 12 and four, the 12-year-old who is driving my mother crasy. She tall for her age and pesters her mother for short skirts, rtens them by rolling up the waist band to away above her

knees! When her mother was out she dyed her hair and it looks hideous, as well as being sloppy. See disobers when Mom says she can't go out and once I actually went outside and dragged her back. She has a nasty temper too. I could go on and on. But-what's the use?—JENNY.

"If this comes about," he said, "it would cause a furore squine and howine society."

Noble blue-bloods of the theroughbred "400" rhed in mink and ermine would meet moosty mickers a bourgoise Belgian or a cusmoon Chylesdale garbed an old stable-dress of faded dealm.

"Take county fairs," the horseman said. "They would elop into live-stock fashion parades. Imagine what did happen if a Holstein beauty refused to go on show ade because she had nothing to wear."

Mature Jersey, Helstein and Ayrahire matrous prob-ably would draw the line at low-cut dresses but the helfer starlets could get away with stretch leotards since they have no utder problems.

Dowagers of the now set, seeking respite from ter worries, no doubt would demand face-lifting sur-ry and three-quarter dresses to cover their natural

"There will be problems," mused the horseman. "Take dog department. French poodles have been pampered, lumed, petied, shaved, shampoo'd and silked and salined a Marie Antoinette introduced the three-storey hair-

A Plague on Press Conferences Are President John Kennedy's periodic press ferences really necessary?

In certain circles south of the border, such a

estion could get one branded as authoritarian totalitarian in outlook.

There is, though, nothing in the concept of democratic government which requires the wounds of the body politic to be bared and probed in public at regular intervals, for the benefit of the news-disseminating enterprises.

of the new-disseminating enterprises.
All to often these irritating epitodes produce
new infection in injuries which were showing
signs of healing without festering.
The truth is not such a simple thing that it
can always be conveyed in a few dozen words, in
reply to what may be an unexpected query.
When, these few words, perhaps heatily assemibled in the mind, are first abbreviated, then
later analyzed at great length, the results can
hardly be expected to invariably present a true
pleture.

picture.

For instance, we should be greatly alarmed if we believed that President Kennedy meant except what he appears to have said respecting a hockast of oil shipments to Cube. He said such adaptements would be an act of war and that it might have serious consequences. With this stand, there can be no quarrel by a reasonable person. But he also said "at this time we do not believe that war in the Caribbean its to the national advantage." That is a shocker, not because of what is said that of what is immiled.

not believe that war in the Caribbean is to the mational advantage. That is a shocker, not be-cause of what is said, but of what is implied. "At this time"-does that mean that Presi-dent Kennedy thinks there may come a time when war is to the national advantage. "To the national advantage"-does that mean that this is the standard by which the President will judge whether or not to commit an act of war? Some who like to consider themselves real-ised will reply that the which a nation decless whether or not to go to war. This, brough, is not realism, not in today's world. How can Pre-sident Kennedy sair for the support of allies if the national advantage of the United States is to be the criterion for decliding whether or not depth the criterion for deciding whether or not steps will be taken which could initiate a thermonu-

Never before in the history of mankind have any nations held such terrifying and awesome power over the future of the race as that possessed by Russia and the United States today. The other nations of the world have a right to demand that Russian and United States leaders handle this power with scrupulous care. Pre-sident Kennedy's words appear to mean that he is not fulfilling his duty. We do not believe soem kennesy's words appear to mean tous to be is not fulfilling his duty. We do not believe that they present a fair picture of the man, of his thought-processes and of his aims. But we would be happier if things like this were not said. Uttered soberly at a press conference at which the world's great newspapers and news services are represented they are more frighten-ing than the blusterings of a Khrushchev mak-ing propaganda before some ill-informed gather-ing of workers and peasants in the interior of Russia.

Guards Can Be Hazard

Guards Can Be Hazard
It will not be long before Belleville streets
are bare—but before that happens we shall
probably have several mornings on which they
are ley and very alippers.
Once the streets are bare, motorists will have
a tendancy to drive faster.
Both these conditions can prove a hazard

Most of these guards do a thoroughly com-

But there are a few who could easily prove more of a hazard than a safeguard under adverse conditions. Not every guard always looks both ways before stepping out in the street with sign raised. We have seen other guards motion sign raised. We have seen other guards motion to children with their signs. Such motions are easily misinterpreted—children may read them as an instruction to cross when the reverse was intended. Some guards do not always step back off the road, leaving it clear for motorists when

A casual trip by a policeman in an unmarked car might help to reveal cases where guards need a little advice and direction.

The government hears only its own voice; it knows that it hears only its own voice, but does itself into thinking that if hears the voice of the people. It even demands that the people also delude thremelves. Karl Marx in Din Neue Rheinische Zeitung, May 13, 1842.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

It's trite, heary, a cliche, worn-at-the-edges but sometimes serves its purpose. And that is the old racetrack adage: fer pays yer money—and takes yer choice."

That is the National Hockey Lengue situation at the preamt as the Black Hawks, Toronto, Montreal and De-troit bear down the stretch breathing down one another's

With the Causdiens, Leafs and Black Hawks having eight games remaining and the Black Hawks a game less to play, it is more or less a toss-up between Chicago, Montreal and Toronio with Detroit being a slightly

The Hawks hold a scant two-points lead over the up-coming Leafs who lead the Canadlens by the same margin. The Wings trail six points behind the Habs.

Detroit can close the gap by defeating the Maple Leafs in Toronto touight, while Montreal can share second spot with the Imlach crew by defeating the Rangers, previding the Wings come out on top.

But the shining light in the weekend scamper for the top seats of the mighty is the Sunday night clash between the Black Hawks and Maple Leafs which likely will be viewed by some 23,000-plus howling Windy City Ians.

The Hawks need this victory badly—and they know it. They have lost their last four starts and seen their once confortable cuthon of seven points dwindle to a skimpy pair. They did not get any smile from Lady Luck when Bobby Hull mined two or three games due to a leg injury, at a time when he was in full geal-coring stride.

Hull réturned to action the other night and scored a I, and his presence on the line-up may provide the sehack mark the Hawka need.

Two weeks age the Hawks were resoning, as healthy a finch as ever rearred up into the heckey blue. Then the greenin that has all the Holes, Levil and Wings at different lates and the health of the h

The Leafs and Canadians have been playing piggy-back this long while until recently when the Imlach in-surgents took the bit in their teeth, romped out in front by four points. On the other side of the record they crept up on the suddenly dormant Hawks.

The other night the Canadiens, despite a lawsuit hanging over Toe Blake and Boom-Boom Gooffries scienced to solitary for fiver games, plus a healthy wallop in the wallet, came to life. They singged the Bootson Bruins for an 2st count and cut the Leafans margin to a pair of points. Toolght they can give the Toronto crew the aboveror; argue with a win over the unspredictable

Meanwhile the Detroit Wings are thundering down the stretch led by the incomparable Gordie Howe. Tonight's tilt in Toronto is a big one for both ctubs and a win for the determined Detroiters will enhance their chances for spot in the top three considerably.

There will be terrific action among the top four from here to the wire. The playoffs table has been set and the four are availing their place cards. All have their cycs on the "roast beet" champlonship but a lot of amongy glances are being tossed in the direction of that hig bowl of lettuce that goes with the main dish.

Meanwhile keep an eye on those peaky Bruins and Rangers. They are off the special guests list but are liable, at any time, to jeg an elbow when the positional apples appear ready for the taking.

Some people think that NHL teams deliberately jockey for finishing positions in order to face certain opponents in the playoffs. This is measures. In a tight race the press play for the money, and there's a lot of it per man between the four places.

The race is far from over. The Leafs are hot at Chicago is desperate. The Canadiens refuse to say "une and a driving Detroit is under whip and straining for better spot.

The scoring championship led by Gordie Howe is etting hotter and closer. The late show should be errific and the big fireworks are yet to come.

Voters in South Hastings ought to have a cleare perspective on the current election carnipalga following Friday swenting's appearance here of Frime Minister John Defembaker.

Frist and foremost, it was made abundantly effects that it was been as the second of the seco for the fray.

Secondly, and largely by inference, the Prime Minister set before his listeners what should be in this coming election—and indeed in all elections—the only issue. That is the record in the last Rouse of Commons of the contending parties, which is always the best yardstick by which to measure their probable performance if entraised with the responsibility for governing. the country.

Though there are several supplementary issues on which honest differences of opinion will arise, it will probably have occurred to most of those who heard the Prime Minister Friday that the way the election will go will depend on whom the majority of voters believe.

on whom the majority of voters believe.
What was the record of the last House?
Was it one of fumbling indecision by the government, as contended by the opposition parties?
Or was it, as the Prime Minister so vividiy
panited it, one of an able governing party forced
to watch its thoughtfully-conceived plans fruitrated by three opposition groups interested only
in obstructing jegislation in the hopes of reaping
a boilities alervating?

an observations regulation in the nopes of reaping a political saviantager² at it is a question of which leader is considered worthy of credence.

The Prime Minister's interpretation of Canada's position is that the country is prospering —In 1962 our exports were the largest in our history and exports for the first month of this year showed a rise of 8.7 per cent over the same month in the record year. If we have problems, they are not insoluble, provided Parliament with appealing approve the measures designed for the provided parliament with appealing approve the measures designed for the cuestion of nuclear warheads for the question of nuclear warheads for

their remedy, he contends.

As for the question of nuclear warheads for
Bomarcs installed at two Canadian bases, the
Prime Minister argues that in the rapidly moving Frime Minister argues that in the rapidly moving world of today changes in defence plans are inevitable—he cited the agreement between the U.S. and Britain under which the latter scraps plans to equip bombers with the Skybolt and instead turns to Polaris missiles fired from submarines. But it was evident that technological marines. But it was evident that technological change alone is not the reason for the government's reluctance to acquire nuclear warheads for the Bomarcs—in the event of war the Bomarcs would be armed. Rather the desire to keep the warheads out of Canada is the government's conviction that disarmament is not "the coll spid of the nuclear age." In other words, fool's gold of the nuclear age." In other words, Hon. Howard Green, minister of external affairs. has won his unremitting battle to keep Canada in the forefront of those smaller nations which are continually bringing pressure on the great are constituting brigging pressure on the great powers to reach some accommodation in the field of arms. 'All Canadians, indeed respons-ble men everywhere, will hope that the Prime Minister is right in believing the prospect for such an accord is not a cruel illusion. The picture of the Prime Minister which

these arguments and attitudes present is a far cry from that sourrilous sketch drawn of him in "Newweek". He says it did him no harm— in that he is right as far as Canadians are con-cerned, for men of every party joined in deplor-ing it, but in lands where he cannot "meet this people," to use his own phrase, the effect may be different.

Fortunately, though, Canadians are the only ones who will sit in judgment on Mr. Dief-enbaker and his record on April 8. If their verdict is against him, he cannot say that his case was not presented by able counsel, for here in Belleville he acquitted himself admirably.

The Sacred Trappings

M. J. Peawick of Toronto sounds libre a poet. He wants to give letsure its proper status. "Clothe it in the sacred trappings and win for it the reverence which society now receives for work," he echocts. "Only when the art of leisure is in full flower and the job relegated to the nuisance eaksorw. "Can man come to the nuisance category can man come into his own and revel in the enjoyment of full

The glory that was Greece and the grandeur that was Rome emerge from the mists of an-tiquity and float with Utopian seductiveness before our dazzled eyes.

Mr. Fenwick, though, may find himself emphatitied in his tensor

He is assistant to the director of District Six of the United Steel-He is assistant to the director or District six of the United Steer-workers of America, whose creed is that fewer working hours are desirable, not because they provide more leisure, but because they mean

Mr. Fenwick says this view that fewer hours Air. Fenwick says this view that fewer hours provide extra jobs is a lot of malarky. He goes further and commits the additional, and inconsistent, herevy of celesiring that there is nobling wrong with filling the presons hours of additional leisure by taking a second job. He is evidently that rare and happy soul who is quite willing to let others live their own lives. Many will find Mr. Fenvick quite refreshing, particularly when they note his courage in choosing the union's magazine to publicize these unorthoods view.

We cannot help wondering, though, whether steelworkers might not have been happier if these views had been held by somebody whose salary

views nad been held by somebody whose salary they did not have to pay.

Laws, we agree, ought to be for other people, not for us, but leisure, on the other hand, ought to be for us, not for other people.

Field Day for Spies

Well, there is one international problem

There is no longer any necessity to worry at the incidence of unemployment amongst about the incide

about the incidence of unempioyment amongs, exploning agenta.

Not if NATO takes the advice of a "high-ranking US. Navy authority." This expert, finding himself posed between the horns of a different control of the c dlemma, has efficiently dehomed the heart. Muclear submarines are too expensive lut auraface ships are too vulnerable. Which, then, shall be chosen to carry the mighty Polaris missiles in NATO's multi-nation nuclear forest. The U.S. Nay expert has a simple solution. Use surface ships, not warships but ordinary merchant ships, cannoffaged. "The Polaris merchanis ships would be un-scored and their defense armount would be

"The Folaris merchants ships would be un-escorted and their defence armament would be hidden so the enemy, scouring the seas, would find it difficult to pick out the right ship to attack." we are told.

Ship ahoy! Spies, away all rowboats.

Of what this latter device is symbolic weare not sure, but surely it would not be too
unkind a cut to suggest that the designer may
have given recognition, especially for an institution of higher learning, to the old adage that
the pen is mightler than the sword.

Rustproofing?

We spill more than others use—to keep your Rambler young for years

Canadian winters can very quickly turn your car into the wallflower of the used car lot. Rust and corrosion take years off a car's value. We've seen figures that say it can cost you up to \$100 a year in repair bills.

Rambler checks rust and corrosion before it starts. Here's how:

GALVANIZING For 1963 all Ramblers have 75% more galvanized metal than before. This is concentrated in critical areas such as the rocker panels which are constantly exposed to salt.

DEEP-DIP The entire car body is submerged into six separate tanks. Each time, a solution cleans, scours and prepares the surface of the metal.

PRIMER DIP The car is dipped again, right up to the roof, in rustproofing primer paint. It gets more rustproofing than any other Canadian car. (And we spill, literally, more than others use.) The body then receives a second primer which is sprayed on, Well over 15 pounds of rustproofing primer now coat the steel. After this, the primer paint is baked on.

TRIPLE ENAMELLING A chip-resistant, salt-resistant super enamel is sprayed and bake ion. A second and third coat follow immediately, then are baked to a durable gloss.

SEALING A corrosion-inhibiting wax compound is sprayed inside girders, rocker panels and fenders. A sealer compound is also sprayed on critical underbody areas to provide additional protection.

Sounds elaborate? It is. This process makes your Rambler the most completely rustproofed car in the world. It cuts depreciation, rust-out repairs and repainting costs. And it keeps your Rambler a pleasure tobehold, years longer. Come time for a new Rambler. you'll be amazed at your trading power. For a rundown on all the Rambler features that give "maximum usefulness to the user," see your nearest dealer soon

"In the recent production of 'Aladdin', Janet Murray was emperted from blonds to an exotic brunette to portray 'Princess Adora'."

That is the way it read, this caption under picture in a contemporary, the Ottawa Journal to be precise.

Ye godsi Is there nothing sacred? We know things have been in a bit of a muddle in Ottawa-lately, politically speaking, but is that any excuse for permitting the hight to spread into the realm of the important, like the supply of natural

blondes?
Here hairdressers all over the country have been bleeching their fingers to the bons, dousing on the percude, or whatever wonder drug the scientific resources of the nation have entruside to their care as a quicker, safer, more potent substitute. And then the decadent theatrical world starts transforming natural blondes into

brunsttes. Statistics show—and there is no subject respecting which statistics deserve more reverence than when applied to the available supply of blondes, brunettes and refineads—statistics show, we repeat, (you can tell how agitated we are we repeat, (you can tell how agitated we are when we have to repeat ourselves and get all wound up in these long sentences instead of employing our usual crystal clear style)—where were we, oh, yes, statistics show that the supply of brunettes is increasing by topes and bounda-wall, by toddies and crusts, if you must be tech-nical, but very fact crusts, indeed. Beddees all those millions of Chinese bables, and the Indians, and the Latins and the rest, were time a blonde marries a brunette the product is likely to be dark as midnight.

dark as midnight.

And then these theatrical people start turning blondes into south brunettes! We call the absention of our readers to that adjective "scotte." In a dignified paper like the Otlawa Zournal, adjectives like that do not appear just by chance. They mean semesting. Of course, the brunette was scottle; sich was readily a blonde. Can you imagine sarything more foreign to our Canadian way of like lian turning a blonder line in sursetted way of like lian turning a blonder into a brunetted way of like lian hardriesers use to make blondes, exoxite blondes, too, mind you, with those dark, siumbering eyes and the full, amouldering lips and ... Yes, there is something to be said for brunettes; something to be said for brunettes; sometimes we think they make the

Unless, mind you, they are used to manu-facture redheads. Any anthropologist from Mars visiting Belleville would be amazed at the disproportionate number of female redheads. disproportionate number of female redheada. Why, he would ask, are there so many female redheada and so few male redheada? He would be erem more justed of the knew that once a redhead always a redhead, lock, stock and barrel, to the third and fourth generation. With all tinese beautiful female redheads, red-headed bables ought to be a dime a doese. But thirty are not. Of course, the damage is not very even black. Unemployment in Ottario in Ottar Oldsmobile prices start just a few dollars above "ordinary" cars . . . but what an extraordinary difference you'll find! Even with the lowestpriced 88, you enjoy all the benefits of Olds ownership: the satisfaction of making a wise investment . . . the effortless going of liquid-smooth Hydra-Matic automatic transmission (with its exceptionally authoritative passing gear) . . . the fiery fury of a powerful Rocket V8

... a down-soft ride second to none ... plus unmatched luxury typified by deep-pile carpeting, foam-cushioned seats, and a safety-padded in-strument panel. Fact is . . no matter which Oldsmobile you choose (and there are 26 mag-nificent models), you'll never find an easier, or better way to step out in style!

So see your Oldsmobile dealer, right now, and step up to Olds!

WHAT IS PERCIVAL'S P.B.C. PLAN?

Our new Percival's Better Credit Plan . . . is a new payment plan which enables you to budget your buying through the entire year, especially in peak seasons like back-to-school, Easter and Christmass. With PBC you act as your own credit manager, expanding and contracting your credit as needed. Instead of paying 3 or 4 payment seach month, you pay only one payment. The amount of your entire payment is all on one account When you need more, you buy more, and your monthly payment is adjusted accordingly. This evens out your spending and makes budgeting easier. We think this is the perfect budget plan.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

The Trail Smoke Esters like any other sports organiza-tion, have made mistakes. After all they're only human and ever since Adam was hooked by a make, drew a mis-conduct and tossed out of the Eden Arens, mere man has been known to err occasionally.

It seems to me, and subsequent events appear to dicate it, the higgest collective mintake made by the saking stone arriving in the home of the Voluments, nucles (there are two kinds) blende flickss and smo-usbords, was knowing the national hockey heroes a feat in an exhibition tilt.

That, nation-wise, is tan tamount to taking a team of professional topers into Mos-sow and drinking the Khrush-chev Khorny Klub under the table in a vodka-tilting jount

The Swedish defeat sent the Smake Earler' popularity mercury harding down to a frigid twenty below zero. They rated a pool in the deep-freeze once occapied by Floyd Patterson sifter he punch-bagged the fistic felol of Gotebury, one Ingener Johansson into a hulk of quivering field.

Perhaps that pre-tournament exhibition defeat still inkled in their minds when the now famous Kowalchuk cident popped up like a mass murder to a scoop-hungry

Big Russ, the likeable Ukrainian, who was a key zero in the Belleville McFarlands defeat of the Kelowan ckers for the 1958 Alian Cup, anddenly found himself o target of the Svenska and other headline hunters.

A Swedish hotel, a porter, a punch in the puns, bruken nose fer Kowalchuk gave the Swedish scribes hat they were looking for. The incident litest was ad enough but the Stockheim journalists gat in a nearly-under-the-bett punch when they colored the ortes with a sexy brush.

Later the hotel spologized. Witnesses said no womer re involved in the incident. The hotel management reed. It demanded the swedish press retract its state ints about "girls"—and in the same sized type.

Whether they did or not makes little difference.

Mrs. Lana Clowes, an Ottawa housewife, can no longer sing with the Ottawa branch of the International Sweet Adelines, Inc. She is a

Her banishment has been decreed by the 8-based headquarters of the Sweet Adelines. That she was admitted to the Ottawa branch the first place is incontroverfible evidence solving its members of racial prejudice.

We are not so sure they will win as easy an acquittal on a charge of having backbones of wet cottonwool.

of wet cottonwool.

In facing this charge Canadian Sweet Adelines will be joined by their male counterparts, the Barber Shop quartets, members of the SPEBSQSA. They have the same rule against

Miss Jane Burns, president of the Ottawa set Adelines, makes out as good a case as sible for acquiescence in the edict from south of the border.

of the border.

"I know this color bar goes against the Canadian Bill of Rights and that the international group does believe in segregation," she says. "But I don't see the issue on Christian principles. I see it on the constitution."

Sounds wonderful—until she adds that the

Ottawa club will not withdraw from the inter-national but would "just have to wait until the Americans change their civil rights laws."

Put another way, Canadians will have to wait patiently until Americans agree with our laws before we venture to abide by the spirit of these laws ourselves.

This is something less than vigorous Cana-

It is an attitude much worse than telling our law makers that we do not agree with the Bill of Rights and will ignore it whenever we can do so with impunity. The truth is that many Sweet Adelines and Barber-Shoppers do not like the color bar.

Some say-and perhaps they are right-that the reason why the rule was imposed in the U.S. was because so many Negroes have fine voices that white quartets could not compete with them on even terms. But there are few communities in Canada where Nergoes are so numerous to make this a real problem for white people.

If the Canadian Sweet Adelines and Barber-Shoppers are able to accept the headquarters dictat on Mrs. Lana Clowes without at least a few quivers of indignation being detected in their harmony, they will deserve recognition as the world's most musical jelly fish. Fortunately, there are signs of discord. One report says half the Ottawa Sweet Adelines are quitting in proat the color bar.

Ambitious Plan

In case any of its are feeling complacent about our schools and the standards they set, or, on the other hand, if any are feeling sorry for students now that final examinations are only three short months away, we have a tidbit of information from UNESCO.

Last autumn, in Warsaw, Poland; two sec-ondary schools started teaching pupils certain subjects in foreign languages. This is the first step towards the creation of four schools in the Polish capital in which instruction will be given in foreign tongues.

In case any suspicious persons regards this as a communist plot aimed at the Russification of Poland, teaching will be in French and German to start. Later it is proposed to give instruction in English and Russian. We wonder what marks Ontario high school

students would get in ancient history if instruc-tion were given in French?

Price Too High

on Redner, of R.R. 1, Carrying Place, was admitted to Believille General Hospital recently with suspected rib injuries. He sustained the injuries in a motor accident in which his car rolled over twice on the Rednersville Road, three

miles from Rossmore.

Mr. Redner said the accident occurred when

he swerved to avoid a dog, which ran across the road in front of his car.

This ought to discourage drivers trying to avoid hitting dogs, much as they may like them. Human lives, and property as expensive as auto-mobiles, are too important to risk for the sake of an animal whose owner does not care enough to keep it from the highways.

Nothing is more dangerous than discontinued labor; it is habit lost. A habit easy to abandon, difficult to resume.—Victor Hugo.

THE IMPORTANCE OF COLOR IN YOUR DECORATING

EACH COLOR HAS ITS OWN PERSONALITY ...

BLUES AND GREENS ARE COOL AND REFRESHING . se colors make us think of fresh, restful scenes — mountain lakes, trees, grass, sical waters. Hence, they're ideal for rooms which get a lot of sum — rooms on court or southers trick of a borner of

REDS AND YELLOWS ARE WARM AND EXCITING

nd yellows are warm, friendly, gay and outgoing. They make us think of needs and yellows are warm, rirendly, gay and outgoing. They make us thick of sunshine and summertime.

Because these colors literally LOOK warm, they are often used by decorators in great advantage in rooms which get little direct sum — rooms with small windows and those located on the north side of a house. They are also used to create a spirit of liveliness and gately.

GREYS, BEIGES AND BROWNS ARE NEUTRAL AND RESTFUL

Greys, Beiges and Browns can create atriking effects, deeplie the fact that are commonly called "neutrals" — restful on the eyes, chronoly relating to be decline a wife range of descenting effects as wife range of descenting effects as wife range of descenting effects. Neutrals are the most popular color group in carpet because they go well search of the other color families. Describing it easier when a neutral carpet is and you have considerable freedom in changing the colors of your walls, upbel and disperies, while the carpet tayes the same.

ALL WELL-PLANNED ROOMS ARE BASED ON ONE OF THE THREE BASIC KINDS OF COLOR SCHEMES

EIGHT PRINCIPLES OF GOOD COLOR PLANNING

L WARN COLORS AND DARK COL-ORS ADVANCE — Colors like red and and orange give the impression of com-ing fowards you and consequently tend and consequently tend really are. Dark shades of colors have the same effect. For this reason, it is possible to make a spacious room seem analler and coirer by using warm or dark colors on the wall or carpet.

2. COOL COLORS AND LIGHT COLORS RECEDE — They have the opposite effect from warm colors and dark colors. They are used successfully to make a small room seem more spacelous. Green walls seem further away than red walls, and LIGHT green walls seem further away than they have been further away than DARK GREEN walls.

B BLENDED COLORS CONCEAL

By selecting the right carpet color, it is possible to conceal elements in a room which seem too large or appear awkward. For example, a large Victorian sofa upholstered in light red material will seem smaller and less prominent if the carpet is a closely blended color.

5. CARPET AND WALLS ARE USU-ALLY IN RELATED COLORS — Since these are the two largest areas in the room (excluding able celling), it is al-ways wise to have them in related col-ors to give the room a sense of unity and organization.

and organization.

C. CAPETS ARE NORMALLY DARKER THAN WALLS — This principle of
decoration grows out of the fact that
we're used to solid ground underfoot
and unsolid air on all sides of us. Fop,
special dramatic effects, however, walls
CAN be darker.

7. COLORS NEED NOT MATCH EX-ACTLY — Matching the color is often impossible, and always unnecessary. A closely related color will blend in vis-ually with the overall decorating scheme of the room.

8. ANY DECORATING RULE CAN BE BROKEN BY A PERSON WITH TASTE AND IMAGINATION — In fact, there are no "rules" as such, since decorating is primarily a matter of taste. There are, instead, guiding principles as to what USUALLY works best for MOST people in MOST circumstances.

Sport Slices...

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

TWEED-Mother Nature has devised various methods of separating "the men from the boys." That goes for sport, business, politics and other phases of life.

Fishing-wise, she fashioned a winter test, mawit-ulty perhaps, that proved and is proving that a large miler of anglers are not laxy summer outs, content drift down a river, or done contentedly under a perhean abole tree.

She set the stage for this northern lakes and stre-ing drama before the Department of Lands and For-te in the script the trout season would open March 1

There was nothing summery about the setting, girl handcuffed her lakes in shackles of ice 28 s thick and mantied them with a snowy blanket the d 22 inches in places.

She snow-choked the lanes and byways leading to trust haunts. She effectively throttled transporta-accept for the highways where man-snade machin-defled her efforts.

But she hadn't reckoned with the hardy breed of mans who dwell in her porthern fastnesses and in the thern banana belts.

Thirrally thousands of them defled her efforts with "kided" knownoble, knownboes, knowls and "drilla-. They dotted her northern deepfreems, knyeled at her new blanket and punctured her ice armor. They found speckles and "lakers" in cooperative mood. The opening day heals were said to be "fair to good."

But the old girl did not give up easily. She won art of her fight because the second week after opening sic saw many of the March First legion absent after sting their fill of fish, weather and adventure.

But many of the hardy breed come and go. And they're discovered flow in Old Lady Nature's plans. They found in the larger windswept lates the ice is be-tween severa of eight lackes thick. The smaller lakes prescrete from the blasts are still covered with a 20-lack armsetphite of ice.

Transportation difficulties have eased to some extendibugh the byways and lanes are still plugged. Nor era residents owners of snowmobiles, are still doing go-baselones.

Recent snowfalls have thickened the carpets of forest floors. Lands and Forests officials say that hardwood stands the depth has increased from a rch 1st 28 inches to a present 22 inches.

In the Bancroft, Pievna, Green Lake, Dacre, White ee and Gilmour forest areas snow is over 20 inches in

After the mild weather of this week some of the smaller lakes are "shashing up" said an official. But in the main the more is loose, making waiting difficult. Not a few anglers from the urban areas were forced to give up the "shaut" because of lack of noown thoses, and insability to secure mechanical snow transmost, and insability to secure mechanical snow trans-

Lately, I am informed, the trend has switched a lake treat from speckles. Anglers are hauling lake from 2% pounds to six pounds from Silver Lake, Cane Lake and Lacky Lake. In some places some 15-pous beauties have found their way to the creeks.

The word got around. The brookies, after the opening day's co-operation went into a huddle and decided to prefer the chilly comfort of their natural haunts to the heat of a frying pan.

But the lakers are still biting and fish-hungry Waltons are turning their attention their way. And at this writing not a few beauties ranging up to ten pounds have been taken.

Lands and Forests Department officials here say they are readying for the greatest influx of "trenters" in history when merthern haunts shed their winter garb. They look for the invasion to start at the first signs of a "fetup" on the part of the weather.

Gen. Burns Suggests Test

Gen. Burms Suggests Test
The value of having a small country like

a suggestion.

The U.S., he urged at Geneva, should provide a panel of neutral scientists with a sealed list of all its underground tests. Russia should provide this same panel with a sealed list of all the U.S. tests it had detected. If the Russian list covered 85 per cent of the explosions listed by the U.S., then it is would prove on exit inspections were unnecessary, as Russia claims. On the other hand, if the Russian listed to detect the majority of the U.S. tests, then the case for onsite inspections would be clear.

It sounds almost fooiproof. Indeed, it would impossible for Russia to cheat in such a test. But the U.S. could list tests which never occurred. Nevertheless, the idea would provide the U.S. with a foolproof method of determining for itself whether on-site tests are necessary. It ought to raise no objection to Gen. Burns' idea; if Russia also will accept the plan the negotiations on a ban on nuclear tests just might get someplace, after all.

Atomic Age Oysters

The atomic age may make oysters as cheap

as hamburger. That is som something to enter on the credit side of the ledger.

of the ledger.

How come?

Nuclear power reactors are cooled by enormous quantilities of water. Once used, it must be discarded, or cooled and used again. Unless there is an inexhaustible supply of cool water, cauch as provided by the Great Lakes), the water 's cooled in enormous towers. These are costly.

A research team of the British Central Electricity Generating Board is studying the possibility using ponds instead of towers.

These ponds would have to be several square miles in extent. In a densely populated country like Britain, such land would be begrudged. But it would be different if the ponds, besides cooling it would be different if the ponds, besides cooling the water, could be made to produce a harvest of food. The water could be kept at a temperature of 60 degrees Fahrenheit and tropical fish, such as the Malayan tipalis, the Nile perch or the Indian marisa, could be raised. An alternative would be to use the ponds to raise oysters, mussels and clams. mussels and clams.

Keep It Under Your Hat

Any man knows how women are about hats. Silghtly elfish! But some high class type Britmanners have found out more about the problem. Their findings are reported in a copyrighted article in The Insider's Newsletter, a weekly news publication circulated among businessmen.

smen.

Women who buy hats with bold uncluttered crowns have a wildly generous, sexually aggressive nature, according to the article, and narrow brims mean the lady is "on the make." Widenaring mean the lady is "on the make." Wide-brimmed-hat buyers are more likely to be frigid and with not a very broad outlook on life. A fourth, and highly significant, dimension

thus enters milady's statistics. A modest 28-36-28-36 would be in good taste. Only the daring would prefer a flamboyant 26-38-26-38.

RARE, MEDIUM, WELL-DONE By GEO. H. CARVER, Sports Editor

It was close to bit not quite the "Sivinteenth of Ireland" 4 day our big aircraft set down at Shannon Airport— as pretty hostess Kildere O'Brien dimpled, "Sure and the difference—every day is Ireland Day here."

Sildare was one of a bevy of "callins"—collects to nead-frinter—who met our party at the abport. Her is were as blue as the Killarney Lakes; her hair sut-was as dark October ale and her killed dress was green of the Shamreck; she pinned in our lipels.

The liltin' brogue of the cute darlin's—there was a on of the bright-eyed mavourneens—was like music ar the throaty garglings of the Prague Cascha. They re part of official reception committees of the Shannon

They not stemmed glasses of Irish coffee to the front of us. Waught the thick cream of the collar of it. Ah, the dark number of the hot coffee of it. And wurnh! the joint of the potcen whiskey that was the body of it.

They smiled skyly when we asked for the bill and told "And "its with the compliments of Shannon and Ired, it is." Then with a swift "tuck under the chins" a swirl of green kills they were away to greet another

I tooked ground mo—and heaved a sigh of relief, here was not a Swedish journalist in sight. The kilp seriest were hig Paddys, polite but not pugnacious, inched myself to one George Houlilann, a genial Mick the face cragged like a ter of Kerry Head. Twas an Lisserick he came, born within sight of Sannoni's

He said his mother named him George after an girth king. "She gut med at me ould man when he raied her far not givin' him a colleen, and named me ter an Englishnam. And me ould bloy a bugler in a Republican army."

"And would ye be tellin' me," I asked in my pidgin Irish-so manufactures the tonsilar TNT you call poteen?"

George drew himself up proudly. "We Irish in-sed whiskey 800 years ago-and don't let the nmed Russians tell ye otherwise."

I checked that. He was right. The original Irish dew of Killamer was called in the Gselic "Uisge Reatha." The first word is presounced "whitagah" and means water. "Beetha" means life, so the name "water of Life." This is the origin of the Latin "aqua vither", the Scandinavian "akvavit" and the French "ean do vic."

"Back in the ould dary when Irith princes and heroes lived in huge castles, they feted the village hidal couples. A special treat was the hot mead spiked with generous gobs of honey, which they drank for a month or a 'moona'. It had a wonderful effect," smalled George, "beace the word Toneymont,"

"And 'tis with that foing, hockey team, yer, are," said George, a big grin splitting his homely Irish mug. Tis a grand game, I hear, but yex should see some av our great hurlin' clube."

"Me ould grandfather used to tell me of the feats of a broth av a hurlin' bhoy named Cuchullain. He was a Munster Prince, who had to travel some fifty molies to the Great Annual Hostings of Athletes at Tara, seat of the high kings av Ireland."

"Cuchullain amused himself by sirikin' a hurtin' ball into the sir many yards sheed and repeatin' the feet as raw without allowin' the ball to touch the ground. In this manner be arrived at the plains of Tara."

"Cochullain huried until he was well past ninety years uge," George west on. "When he was 91 he was lob-the ball over a high barn wid his brother when a bor happened by and asked about Cuchullian's ould

"He's folse, and able," said Cuchullain. "Ye'll find him over in the village hurlin' wid me grand-daddy,"

66 Houses nowadays become obsolete just like cars. That's why I moved into a Medallion allelectric home with flameless electric heating. There are so many better-living ideas built right in, it will still be up to date years from now. Let me tell you about them. 99

66 Take concealed and decorative lighting . . . I always thought that would be a bit rich for us. Not on your life-it was already built-in. You know, it really gives the rooms character and we have lighting in places like the kitchen counter-top and in all the closets.99

66 I guess my wife should tell you about the hot water. We have one of those new super-fast electric water heaters. I'm no expert but if we turned the place into a hotel I'm sure we'd still have enough hot water for everyone-at the lowest cost, too.99

66 You know, we're loaded with electrical outlets in our home. This is a big help when we're arranging furniture. Then, of course, we can install all the electrical appliances we want without rewiring and my wife can use them without blowing faces

66 I first thought the electric heating might be a little heavy on the Hydro bills. But no sir-I've had higher heating bills in the past. And when you think of the extra comfort and safety electric heating gives-any home without it will be outdated in a few years. ??

Whatever home you plan to buy, big or small, look for the Medallion sign of all-electric living. It means there are many live-better-electrically ideas built in to guarantee your extra comfort and convenienceand to safeguard your home investment.

Russian School Technique

Back to the little red school-house.

Just when we, in Ontario, have got our provinces neatly carved up into high school regions and have eliminated the one-room elementary schools except in the backwoods districts, along comes a Russian and holds up his hands in horror.

Well, not quite like that. If it were, it night be just another communist trap.

What happened was that Dr. Alec Sholnick, psychiatrist from San Mateo, California, Is back reporting to the home front after visiting the Soviet Union to study juvenile development

He says that teachers he talked to were shocked when they learned that in the U.S., as in Canada, children change teachers with each

"Why sometimes I don't even learn during the first year or two how a particular child thinks," exclaimed one teacher.

The Russians have devised a neat trick whereby they enjoy the benefits of specialization all down the line—teachers specializing both in subjects and in objects, that is children. Starting in grade five, the Russian child goes to different teachers for different subjects, but has the same senior teacher following his development, advising him and checking with his parents all the way to graduation.

It looks as if the Russians have stolen another march on us. Leon Trotsky, in his monumental history of the Russian revolution pointed out the fact the industrial revolution came late to Russia tended to make what factories it had amongst the most modern in the world at the time of the revolution. Similarly, it would seem that the Russians, because they had no well-organized compulsory school system have been freer to improvise the present estab lishment

Some may object that knowing how the pupil thinks is not anywhere so important as knowing what he thinks.

But that is just the point. Surely communication between teacher and student is much simpler if each understands what makes the other tick. The annual meeting of the Belleville Children's Aid Society the other night held a Children's Aid Society the other night held a panel discussion on communication between parent and child. The panel decided communi-cation was far from good in some cases, and that this can lead to many misunderstandings. If parents find it difficult to understand their own children—and what purent dees not—them is it any wonder if teachers fail to establish a rapport with some students in a year, even granted that the teacher enjoys the benefit of the parent of the source of the control of the teacher of the control of the parent of the source of the parent of the source of the parent of the source of the parent of parent o

special training?

The Russian system would be fairly easily in some cases might The Russian system would be latily cool, applied to high schools—in some cases might actually be considered in effect with the same teacher instructing in a subject year after year. It would require much greater re-organization to test the system in elementary schools, but this might be well worth the effort. Dr. Skolnick reports that, despite what we may have read, there is no real juvenile delinquencey problem in Russia. Come to think of it, delinquency was in Russia. Come to think of it, delinquency was not an acute problem in the days of the little red school house, either.

U.S. Both President Kennedy and Labor Secretary Witt have put their opposition on record. Their position is that cutting hours without corresponding pay cuts would lead to higher prices and shrunken real wages, would not increase employment and could very well reduce it. It should be noted, however, that opponents of the union campaign are not saying that there never will be a 35-hour week. The historic trend is to ever shorter hours. But it is a natural to the control of the contr able and economically feasible

This selective approach has been the pattern ough the whole history of the trend to higher pay and more leisure.

DEAR OLD ROOMER—If you want purple floors and red-and-green drapes, have them! Plus a lock on your door. Are Snoopers Inc. looking for buried treasure—or just a man under the bed?

DEAR DORIS—My girl friend who is fifteen is going steady with a boy eighteen. When she goes out with him she feels the doesn't want to be seen with her, because he always stands where subody can see them. He's good looking, has a good personality and has many friends, but she feels that he is too good for her. What should she do? rase don't get the wrong impression about going in dark because he is a real nice guy.—D. J.

DEAR D. J.—All I can say is such a boy ought to be doing his courting on a desert island at midnight. Either she should drop him or drag him out into the open. (To make sure of a reply to your question, lose a stamped, self-addressed envelope.)

TWO STYLES OF WONDERFUL

IN THIS ONE BIG COOKBOOK!

Deep South Style ... AND Southwest Style!

Nowhere in America will you find so many staunchly traditional dishes as those of the deep South which were developed on the old plantations east of the Mississippi, and those which had their origin in the Spanish, Indian, and Mexican cookery of the Southwest. In this unusual book the most famous of all the foods of these two great regions have been brought together for your own eating pleasure.

THE SOUTHERN AND SOUTHWESTERN COOKBOOK

Jam-packed with wonderful recipes, this is the current release in our offering of the 24 Cooking Magic Cookbooks. The Southern and South restern Cookbook is yours now, for only 40c each during this special offer. All early releases in the set are available also.

On The Political Front

IE NYONEM "In the opinion of most Ottawa observers, the government must carry the big share of the blame for parliamentary near-paralysis. It was the Prime Minister's decision not to call Parliament into session until Sept. 27, thus passing up three months of available sitting time. It was his decision to send the members home for an unearned month's vacation at Christmas."—The Financial Post ASS "The Liberal Leader's firm stand...appears to mark an important trend in Canadian politics-towards decisiveness, a virtue which many feel has been almost completely lacking among Canadian political leaders for too many years."-Winnipeg Free Press "Mr. Pearson has started campaigning with a hard honesty that has been missing from Canadian politics for too long. He is morally right, and we have a strange hunch that he is also politically right—that the voters are fed up with pie-in-the sky and want to hear the cold truths."-Montreal Star "In attacking Mr. Pearson for making a decision and inviting the electorate to judge him on it, the other three parties play the politics they affect to abhor. Unconsciously they also do something more. Their unanimity of attack suggests that they fear Mr. Pearson is running ahead, that he is the man to beat."-Toronto Globe & Mail IIIE CADADIE "The Liberal Party, it is now perfectly clear, is the only one to have a defence policy worthy of Canada. Canadians who value this nation's security and integrity therefore have no other alternative but to accord the Liberals a strong mandate in the April 8 election . . . That there are other big issues in Canada today goes without saying. It is time we had someone capable of measuring up to the job's stern responsibilities."-The Calgary Herald Liberals... are the only possible government. The course of wisdom, therefore, is to make it clear both at home and abroad that Mr. Pearson will be Prime Minister... and that Canadians will give him all the support necessary to put our mismanaged affairs in order."-Financial Times. RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

The Trail Smake Enters falled to bring he orld beckey champlouskip but it was their p ands that helped swing the global puck-honor alum to the side of the Russians.

The Swedish champions, despite the upset defeat by Czechs that spolled their unbesten record, felt confident Canadians would help them to their second world title

They had the punch and the samegashords of vic-tory ready for the celebration. Tumba Johanness, the toast of heckey Sweden, and his fine citth were to be acclaimed world champions for the second consecu-

Points-wise a Russian victory over the Canadians meant a the for the title between the Sewedes and the Reds. This meant the winners of the world bauble would be decided on the goals average.

Naturally, the Swedish fans were rearing for a sadian victory or a tie. Either would leave "Bunay" estrue's International Ice Hockey Federation trophy its Swedish maniel.

The Swedish fans were confident before the game but as the Soviet score against the Smoke Enters of Canada mounted their hopes began to fade. One, two, three, four is nothing the nooreboard said—and the Rus-sians had the title "in the bag" with a three-goal mar-

The Canadians fueled the Swedish hopes into a temporary flare with two lightning goals in the closing seconds of the game but it was too little and too late to swing the tide of championship victory.

On our side of the ledger it was the first time a Western Canada team had foliod to bring back a world champlooshly and the first time Canada has falled two years in a row.

The Swedes, Czechs and Russians were well-coached ads which entered the tournament at the peak of con-on. Perhaps never in world tournament history were top four teams so evenly matched.

True the Smekies finished in fourth position but this was not from lack of ability. Man for man they were a good as any. They did lack the "horses" in a sense and they were not in the superb condition of the

Fendities, some of them foolish, and others attribut-able to the international rules, played an important part in the Smoking' downfall. And they fell down in the clutches. In the Czech game they reared back to the the sever 1-1 in the second period. But they failed to maintain the pace in the final frame and were beaten

All of which makes one wonder where does Canada go from here? What are our chances of fielding a citale comparable to the top European squada for the 1964 Olympies? Ferhaps Father Baner, coach of the callege-based crew which will form the nucleus of our Olympies team has the answer.

No recipe is much good without the proper larged-lests. The CAHA after our dismal showing is crying about the need for a national seam. I note that it did not go set of its way to help the Smootles-pulyer or money-wise. Now it is yelping after the barn door is locked and our hockey horse stolen.

Admirable Strategy

Sir John Maud, British amba orior to the Republic of South Africa, will invite non-whites to a party marking the Queen's birthday on April

We do not know precisely who deserves the credit for this decision, Sir John, British Foreign Secretary Lord Home or Prime Minister Macmil lan himself, but the procedure to be followed is politically wise and impeccably polite.

As long as South Africa was a member of the Commonwealth, any such action would have been interpreted as indefensible interference in the domestic affairs of the dominion. The decisions of the Queen in right of South Africa would have been flaunted by Her Majesty's representative from the United Kingdom.

Now, though, the Queen and her Govern-ent in the United Kingdom are released from heart in the Omer Languoin are reassed rinker repossibility of refraining from interfering in the South African affairs. The duty of an ambassador is to represent his government's views in the country to which he is accredited. It is the view of Her Majesty's Government in the United Kingdom that the best hope for Africa lies in the establishment of multi-racial govern-ments. Ignoring apartheid and inviting Negroes, Asians and "coloreds," or half-castes, to party in honor of the Queen's birthday makes his view crystal clear, without breaking South African law. The embassy grounds, technically, re not South African soil but part of the United African law

Kingdom.

The crowning touch, though, is Sir John's decision to hold two parties. One will be staged in the morning, for South African cabinet ministers and senior diplomats. A second, for the general public, will be in the afternoon and it is to this that non-whites will be invited. Enarrassment to South African officialdom is thus arrassment to South African officialdom is thus olded. If any person feels strongly opposed ainst the lowering of the color bar, he can sent himself from the afternoon party without against the lo there being any chance of him getting much publicity mileage out of his absence. Altogether an admirable strategy, brilliantly

Now Is the Hour

Twenty-five centres and communities in Ontario now have retraining programs for their unemployed, according to Kenneth Schultz, of the Ontario Department of Education. Belle-

wille has no such program, yet.

But locally unemployed may be able to receive retraining in Belleville within the next few weeks, if the city council decides in favor of the move. The Department of Education is ready to co-operate, and the facilities are avail-able. "All that is required is the organization," secording to Alderman Enos David.

Alderman David is one of three council mem-Aderman David is one or three commentments as mand to nominate a "Mayor's Advisory Committee" to consider local retraining. One assumes the advice offered by the committee will echo Mr. David's own, when he said, "In my opision we have waited too long in setting up

The Encroaching Metropolis

Perhaps Belleville residents are not aware of it but their municipality's sovereignty is slow-ip being encroached upon in a most subtle and underhanded fashion. Perhaps this insidious encroachment was

realized some time back when city council, in one of its weaker moments, changed the Trent Road's name to West Dundas Street. Whether or not this move was an unconscious effort to stem the tide of possible annexation is not

Nevertheless a resident on West Dundes St. living well within the city limits reports that when his telephone was recently installed he was when his telephone was recently installed he was provided with a directory whose yellow pages listed only Trenton business firms and numbers. Perhaps Trenton is engaged on its own "Drive to the East," and Bellevillians will shortly fall

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor If that gentleman in blue stops you on the street, don' alarmed. He has a ticket in mind but not the kind assually get from a limb of the law.

. If you look closely you will find he has a ticket for the annual Police-Firemen bockey game stated for the arena Friday, March 29th.

He will be smiling—and you will keep him that way if you dip down into the wallet and produce the coin of the realm—the leafy sort preferred—take the ticket or tickets and go happily on your way.

The puck jounting is sponsored annually by the Belleville Shrine Club and Shrine president Phil Davis has a hard-working committee on its toes going all out to make the 1963 event.as successful as previous years.

The committee is headed by Noble Stu Hibbard, with bles Tom Lewis, George Mueller, Ralph Plumpton, Orliff iller" Lloyd and others lending willing, helping hands.

Unfortunately there was something of a mix-up last year when the famous Rocket Richard was the special guest referee. Some confusion reigned in the seiling of tickets and to eliminate this, the committee in charge decided to conflue the seiling of the tickets to members of the police department and fire department exclusively.

In this way there will be a sharp check on the number of tickets sold so that every purchaser will be able to exercise his purchasing right and see the game. There will be no tickets sold at the areas.

Efforts are being made to bring an outstanding Na al Hockey League personality here to act in a referee

Meanwhile the word from the two hockey from is as scarce as a dowager at a twist session. The police squad under the guidance of Bill Stephenson, am told, have something up their sleeves and are no letting any informational gems out of the confines.

The Smoke Eaters the underground says, have nothing hide. They have been playing all winter in the city trdepartmental league and feel that this one is in the known "bag."

"II Inspector Clare Hayes thinks his Untouch-les are going to take this one, he's got another guess ming," a Smoke Eater said today. "They couldn't lick postage stamp let alone our clab—and you can tell him said so,

Rivalry between the squads is a lot keener than what sears on the surface. The Battle of the Blues should elop into quite a jousting before the final whistless t with no quarter shown nor given.

Those responsible for the production of the Quinte Ten-nis and Stating Club's annual figure-skating extravaganu-have shown delightful variance in the presentations year to

Colorful in costuming, outstanding in individual and collective presentations and climactic in effort of coaches, east and others associated in production, this year's about prombes to highlight the event's long sequence.

The 1963 production takes its theme from the "magic lantern of the living room." It is called "TV On Ice" and is just what the name suggests. Music, akits, individual and collective numbers are themed on outstanding shows of the picture tube.

From "Fred Flintstone," the here of Bedreck, to the upreariess antics of the "Beverley Hill Billies," the show runs a gamut of well-known television presenta-tions with a touch of motion picture highlights for good

This, I believe, has entailed more work, time and effort than presentations of other years. But the work has been made much easier because of the continuance of the Star Test system introduced last year and which has given excellent group instruction to the junior

The importance and value of this system is seen in the erformance of the youngest member of the cast who has at turned her third birthday.

"TV On Ice" has a cast of over 100 skaters of the city who have been experity coached by the ciub pro-fessionals, Mr. Paul Totien and Mrs. Bonnie Boundy, Both coaches have important roles in the production.

The ensemble numbers are gay, colorful displays of cision skating, depicting the various TV topics in gay tume to the same music and rhythms that background originats.

The opening precision number is "Top Hat and Talis" a girl ensemble in costuming that is little short of centeralizar. And that gallant company of "creaking medians who made such a lit in their 1962 chit, "Gay addes of the Nineties," are back in a hilarious presents no of the "Rilbullies."

And Belleville's own brilliant shating youngsters, Jane and Peggy McCutcheon, new associated with the Teronto Cricket, Skating and Curling Clab, will appear in sole and pairs that have wen them outstanding ac-claim wherever they have appeared.

chins wherever they have appears.

The music always an outstanding feature of the show has been carefully selected and taped by Dr. W. B. Beittle, president of the club and chairman of all the committees. Dr. Beattle spent many hours tuping and co-relating with pauses and amouncements carefully speeced.

The costuming, a highly important part of the unual show is a brilliant tribute to the efforts of Mrs. The No. Olivia Weese and Mrs. Theina Mac-Donald. Those ladies have excelled thenselves in the production of the snaw wardrobe items that, as in former years, will be an outstanding feature of the ice

Let's Hope He Was Joking

At Monday's City Council meeting, 'Ald. Jack Allin asked Mayor Haig a question. He wanted to know whether a report in Saturday's issue of The Ontario Intelligencer regarding the transfer to this city of Ottawa operations of the eastern region of the Hydro was correct. If so, he ask why was no mention made of the role played in this decision by "our two members of parlia-

Of course, Ald. Allin was just joking in ques-tioning the accuracy of the report. He knew it was true.

It was true.

We trust he was also joking—though if so
the joke was in questionable taste—when he
intimated that 'two members of partiament' had
anything to do with the decision by Hydro.

For if there is one operation in which politicians have no business medding it is Stydro.

The Ontario Intelligencer made no mention
of the intervention of "two members of parliamentions of the control of the participation in the decision. If such a hint had been

The second question is whether past performances by the Ruisians and their Cuban allies would indicate they are so sloppy and thoughtless that they would not read missine being test fined could be heard all new prison in which the women were located. women were located. It seems to us that the answer to this question ought to be in the negative

The only possible conclusions are that either the women did not hear missiles test fired or that they heard these tests, but that the missiles were not of a type to which the U.S. objects.

In other words, the women's reports are of no military significance.

A Small Voice

The use of automated systems to keep track of the three-year driving permits to be issued in Ontario near year will not result in a reduction in Idence bureau staff, according to Bon, James Audi, provincial transport milister. Mr. Audi and the persons replaced by machines would be absorbed by other branches of the Department of Transport, "to handle the steadily increasing work load."

work load."

The work load of the department seems to be purely secondary. More important are the feelings of the staff members who may see a threat to their proverbially "safe" civil service

But it might not be a bad idea for Mr. Auld to consider all the taxpayers, who pay those "safe" salaries. Security is a fine thing and all' that, but economy is not a total evil.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

Now we are crying in our cathina and hayracks, moan-ag something must be done about Canada regalning her rood position at the head of the international bocket, last. This is not a new record. It was cut some time go but the power-stable did nobing about it until the hellacking given the Trail Smoke Extert this year brought one the fact that the recent world victories of Sweden of the United States over our entries were not flucts or achieves in the pass.

Now they have decided—and rightly so—that the trouble lies in the selection of the team to represent Canada in these international hockey high jinks. That is not now either. What is new is the fact that Canadian top hockey authorities now realize it.

The day of winning a world championship for anada with a "community" team, plugged overnight ith so-called reinforcements and relying on home-hrew nancing is over.

If we want to best 'em, let's join 'em insofar as training, coaching and financing is concerned. Select the best we're got, coilege or otherwise, train and coach, them for a year as a clob, play the heart out of them as a team, don't spare the financial horses as far as necessities are concerned: then all back and watch what

If we cannot do it that way then our day as top-dog of the international bockey keaned is over. Until perhaps the day when European clubs reach the point of perfection where they think they can take on the NIIL clubs. Much Sound, Little Sense

The City Council has endorsed a resolution by the Sarnia Council asking the Ontario Minister of Public Welfare, Hon. L. P. Cecile, to establish an equitable system of assistance for citizens on fixed incomes "who are the victims

This is one of those resolutions which sound wonderful as a whole, but which start giving out a peculiar hollow ring once one commences to harken to the several parts of the tune.

First of all, everybody on a fixed income is a victim of inflation, if the income has been fixed long enough to deserve such an adjective,

Surely it is not proposed that everybody on a fixed income is to receive assistance.

If it is, we can confidently forecast a veritable

howl when such a policy is established, particu-larly in view of the fact that the Ontario Government's taxes include a sales tax, which is paid by all classes of society.

If it is proposed that assistance should be limited merely to those in need, then there is no real reason for mentioning fixed incomes and inflation. The needy are needy, regardless of whether or not inflation is responsible for their plight. The resolution suggests some relief be pro-

vided to property owners with fixed incomes.

But to achieve this end with any semblance of equity towards other victims of inflation is well-nigh impossible. Indeed, the owners of real estate, in one sense, are less likely than most to be amongst the victims of inflation. Property to be amongst the victims of inflation. Property values have increased at least as rapidly as the value of money has declined. The man whose savings are invested in real property may find increased really stare extremely burdensome, but his capital has increased. Not to the capital of the man whose savings are in life insurance or government bonds, or whose investment has been in an annutity or in some other type of considerations.

The only feasible, effective relief for property owners on fixed incomes is a reduction in the taxes on real estate. Municipal councils, here and in Sarnia, could do something more helpful than passing resolutions in giving leadership to such a development.

Worthless Money

An extreme example of what can happen to a country's currency when its government con-sistently and extravagantly outspends its income is the present situation in the Congo, now in its third year of independence.

chard Hall of the London Observer, writing from Leopoldville says: "The country's linances are in a shambles, and the Congolese franc piltrilly weak. In Leopoldville in deficially exchanged for 63 francs; on the black market it fetches 290 francs. In repeated efforts to meet its deficits, the Congolese Government has issued 11 times the amount of surgeous ment has issued 11 times the amount of currency that was in circulation at independence in mid-

Canada is not the Congo, of course, but those economists and government advisers who assure us there is no serious danger of inflation in large and regular deficits—at all three levels of government—might tell us why something of this sort can't happen here.

Point of View

Educational officials in Windsor plan an inquiry into the teaching of political ideologies to secondary school students. Apparently the concern is that communism, fascism and capitalism should be presented in a "forthright and

There is plenty of room for doubt that "an There is plenty of room for doubt that "an, objective and forthright" comparison of capital-irm and communism is really what the officials are after. One assumes they are concerned merely with avoiding blatant anti-communistic alanting of the material. It is reasouring to know, however, that any teacher who would not be suspect in the United States would be an object of suspicion in Canada.

On the east coast of Malaya you enjoy life, on the east coast of Malaya you enjoy life, you laugh and have fun, you pray to Allal life, work, you eat, sleep, make love, but in all you work, you eat, sleep, make love, but in all you have a reverence for life. If there is a spirit in a rice grain, you can't lli-treat that spirit. You must respect it. Spirits in the hills and the trees and rivers near your home spirit. You must respect it. Spirits in the hills and the trees and rivers near your home make you feel an awareness, a reverence for your surroundings. TO OUR FARMERS

For the farmer who wants to expand his farm, to make it more efficient and economic, to the farmer whose sons want to stay and continue to work with him, or on their own, we have established a Farm Credit Corporation, and the means to extend millions of dollars of credit is now available.

And to the dairy farmer, the backbone of the rural economy in Ontario, I say there is hope for a brighter future. Measures will continue to be taken under the Agricultural Stabilitation Act to bring about that stability of prices and that stability of income that you have asked for over the years.

Export markets for your cheese are being expanded. Pr Supports at a fair and reasonable level for your botter fat's milk posder by purchasing supplies from time to time for by the World Food Bank, a Canadian proposal, for use by thungry people of the world.

The great shary industry of Ontario is one of the largest myvicts for the western feed grain in the world. The porce of the government through the Canadian Wheat Beard end at the Lakebead. The Prices at the Lakebead are fair and at the Canadian wheat the Canadian wheat when they go reasonable but the farmers in Ontario find that when they go when they go to a point where they are too expensive.

We acted, knowing of the great expansion that will take place in the livestock industry in Esstern Canada which will result in a great increase in feed grain requirements in the next twelve years. In the Speech from the Throne we said we would bring forward our proporats, and we placed before Parliament our intention to introduce a Bill in this regard—an Eastern Feed Grain and Storage Bill.

The Opposition saw to it that this legislation would not forward. Their desire for power was greater than their ce for the welfare of the people. They showed they caree for power, they cared only for themselves. They cared any they cared only for themselves. They cared a Parliament. They cared not for the people, but for powe the people.

This act will provide and ensure contin-western feed grain at all times.

. If will ensure that there is adequate government streed grain in Ontario.

Subsidies for the movement of western feed grain to Ea Canada will be continued and increased, and by incorpos this year to year policy in this new legislation, the feed fr assistance program will then become statutory.

To encourage farmers to purchase their feed in large quitities and thereby cut their costs, this legislation will progrants to farmers to encourage and assist in building madequate grain storage facilities right on their farm.

Teen-Age Son Acts Childish DEAR DORSE—My problem is my bessage son fourteen years old. An average son fourteen years old. An average boy except he deem't take life, seeous, work perious enough. It's quite seear to me all he wants to do it play with toys that little children play with the bangs the doors when spiced to do a small chore.

DEAR WORRIED — is his door-banging hiding trations? Perhaps be can't cope with grade nine. C ish ways, shirking a challenge, so-called pig-beadedin all those suggest a serious conference with a child expert. Expecting too much can only be heart-bree for all of you.

DEAR DORIS-Could you tell me wh haique of plane tuning?—FRIENDLY.

DEAR FRIENDLY—This is a vocation successfully tered by many bilind or near-bilind persons. For a teach in your area, get in touch with the Canadian National stitute for the Blind, 465 Union Street, Kingston, Oct., with a plano store.

Sport Slices ...

RARE, MEDIUM, WELL-DONE By GEO. H. CARVER, Sports Editor

Two years ago I saw the big handsome bloke in a seing room in Memorial Arens readying to take on a cy forman in the main bout of a wrestling card.

I saw him again at the Skrine Chub Wedneeday ht. He had metamorphesed from the lithe trunked g athlete into an impeceably-garbed Skrine official.

He is Noble Athol Layton, known to thousands of international wrustling faxs as "Lord Athol Layton, The Genilleman from Sarrey," He is one of the few mat stars who endeared himself to the wrestling faithful

Tall, dark and handsome Athol as much at home in after-dinner speaker's role as that of the hero of grunt-sproan main bost, was loudly acclaimed by fezzed iners after a well-delivered serio-humorous address.

He has the oratorical ability of a seasoned mer speaker. He has the appearance and a srm of the traditional matines ided. His chippe e Australian-English was a delight to the car

He told the Shriners many experiences of his ring reer. He told them of meeting famous world cham-ons in and out of the ring. He told many inside stories the controversial sport of wrestling. His personality ached out and across the head table.

He fold of dramatic moments of the spect he carnod in his native Australia. ("I adopted the Brich has me to antequalse Americans when in a vil-tuble role.") "I will never forget a once-proof world hampion, as ided of mine, who crewited through the open of a wreating ring in a financial comeback. He may do not not be supported by the property of the page Joe Louis. It togged at once heart to see it."

Athel fold a weird story of a well-known topflight wreather who had two bobbles, beautiful herees and brety wasses. "He often said, "Layten receiled, "that ofter he died he would like to have his skin removed and insued into fasther. This would be made into a notifie for haldes, so he would always be between the two things he loved best. Fine horses and beautiful work had been been received by the contract of the men that the court heart. The horses and beautiful

Layton had some amusing experiences with for rid heavyweight champions who augmented their squara with acting as referees at wrestling matches.

"I was on the card at Boston when Rocky Marcisno officiated at his first grappling match," he said. "Before the gong rang to open the bout I noticed Rocky fldgeting with a pencil and piece of paper. I walked over to him and asteed him what he was doing."

"He said he was getting rendy to score the bout. He figured they did it by rounds and points the same as in beging."

"Big Maxie Beer, the clown prince of boxing, would never get down on all fours to make the count after a fall." Athol recalled. "He would stand there in his str-feet three and tap his foot. One night Fred Atkins pulled his feet from under him, 'worked him over' a bit and tabl he he would have to get down to the same level as wreathers if he wanted to succeed as an of-

Layton once wrestled huge Primo Carnera- the Italian heavyweight boxing champion who turned to the grapple on after being fleeted of a boxing fortune by unscrupu-a hangerson."

"In entered the ring and looked up at the man insensitin facing ma. "He stood six feet nine inches, five inches taller than me. He, looked down and grinned. "Hi there, little feller," he said.

Wrestling has always been a great lesson in psychol-ory for Layton, he says. "Many times I have lain in the ring watching the spectators from the corner of my oyn. I have seen strange behavior like grey-daired ladies going aimset between. Belleve it or not, it is good for them. It relieves them emotionally

"Many people may not see eye-to-eye with wrestling, but it actually is worth something to a community. I have known dectors, to recommend it as a form of therapy which gives certain people emotional relief by simply mixing with the fans," Layton said.

Time for Sweat and Tears

"Politicians of all parties should be telling us precisely what long-term measures they would take, if elected, to correct our deficits both at home and abroad," says the Toronto Globe and

Mail. The Othawa Times voices the same demand.
"There seems to be a conspiracy of silence on the
subject of bringles deficite," it compaisas. "Let
there he no doubt about it. We are going to be
forced to bring our income and our spending
into closer balance, whether we like it or not.
-Politicians about the telling us how they or
to do the job."

to do the job."
The demand is valid. But one does not need to poinces an LQ, of 180 to realize why its will rout be mit. The Cohawa Times lists two ways in which such a closer belance between theorem and expenditures could be achieved. One way its youthrelling expenditure and stimulating the concompt to provide more revenue without rail-ing.

The Times says we might even cut will be the concompt. In Times says we might even cut will be the concorned to the conc is by controlling expenditure and summining this secondary to provide more revenus without raising taxes. The Times are the stope of solution which politicalism like. The difficulty is nobody to far has been able to make this formula work or very long. If it can be done, it will only be achieved by unusual methods and advocating nusual methods intribe hand criticism. Foll-ticlans do not like harsh criticism of their economic policies. Therefore, they retuse to enter into details, to bell us how they propose to dome proposed to the second proposed of the proposed of the proposed of the wealthy of the critic.

The second way of bringing income and expenditure into balance is time-tested and proven—it is to cut expenditures, increase taxation or both. The difficulty is that the accompanying currantee comes we with awards and tear, even without blood, unless the mation's pight is desperate.

There is some startling evidence, though, that our position is just that. The federal deficit this fiscal year will probably midge \$800 million, says the Oshawa Times. It quotes the non-partisan Canada Tax Frundation as saying that next year, if the rate of spending and the deficit will probably be around \$800 million for the probably be accounted the last very another than the probably be accounted \$800 million. The more account of \$800 million and the probably be accounted \$800 million for the account of \$800 million for the probably be accounted \$800 million for the account of \$800 million for \$800 mil

sangaine. If the Dietenbuster Covernment stays in power for another year, he says, and continues spending at the average rate of the last six years, its total spending since taking office would equal all federal expenditures from Confederation until 1946, including the cost of two World Wars.

World Wars.

Perhaps it is time some political party start-ed advocating a goodly dose of sweat and tears, if only to save us from sweating and weeping blood a little later.

Soul-Searching Is Indicated

Before Ottawa follows the lines of an article in the Financial Post and gives away a significant portion of the Canadian market for manu-facturers to China as an inducement for further grain purchases, some extensive soul-searching on the part of the Canadian trade planners would

appear to be in order.

One fact which seems to be generally over-looked is that the purchase of foodstuffs by China —particularly from the democratic countries of

—particularly from the democratic countries of the West—is a temporary expedient at best. Politically, such purchases are most unpai-atable to the Petking regime. They represent an open admission of the fallure of communist society to produce the basic essentials of life. Politically are also practical considerations. Children are also practical considerations. Only the product of the product of the product of the analysis of the product of the product of the product of the analysis of the product of the produ

Unins now has amost 700 million mouths to feed and the number is growing daily at an alarming rate. Clearly, China must overcome her agri-cultural difficulties and become self-sufficient or nearly self-sufficient in foodstuff production or

These are two compelling reasons why China cannot logically be considered a long-term cus-tomer for Canadian grain. In light of these facts, how much in the way of trade concessions should Canada give in return for what, by de-finition, can only amount to windfall exports? The answer, it would seem, is not very much.

much.

Red China, it should be remembered, can cut
off Canadian grain purchases at any time in the
future at a vertible stoke of the pen. "Vet if
Chinese imports have been permitted to flood

DO YOU OWN A WHITE ELEPHANT?

Many families now own a beautiful home for that sits in their home permanently empty.

To us this means owning a White elephant. A freezer is for sure one of the very best ways to help families save on the cost of living, but it is useless if empty. So if you are one of these families, why not give us a call and see if we can assist you in keeping it full.

Hundreds of families are now using our services in the Belleville Trenton area; find out for yourself why they are so content with our service.

If you don't own a freezer but have been considering the possibilities of a food freezer service, then

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

"If you have me eye for figures other than the 33-23-36 variety" said the expert young mins" you may mark down in your black book of records, that the odds are against Toronto Maple Leafs winning the Stanley Cup."

I learned about wimmin from 'er" that all powder room conferences are not themed on men, girdles, wigs, the high cost of livin' and lovin', politics and other

My favorite bank receptionist, a staunch Black Hawks porter, who fluttered another dollar this morning that Windy City crew would bring home the Stanley Cup p, will be glad to bear the distaff side prediction.

Since this department's fickle crystal hall has shown a great big guy leading a hand of red-westered hunters with large wings on their bosons to the Stanley Cup hideout, I was curious as to how the powder room prognosticator reached her odd-against decision.

"It is quite simple", the eaid, "If you believe in sta-tistics and study the National League championships and Stanley Cup winners records from the 1227-28 season when the Prince of Wales Trophy was first awarded to the league champions."

She produced a figures-freekled piece of paper that ted like the income tax return of a bookmakers' union. "If you can decipher this", she smiled, "you will

at you can eccipier tank, see nance, you will that the Maple Leafs have wen the Stanley Cup fit times since 1971-25 but took the league champion-pouly twice, And get this — just eace have they wen beague title and cap together and that was in the 17-48 season, the last time they was anything."

"Doesn't that indicate, according to the law of averages, the Leafs are due to repeat?" asked a kibitzer, well was for his hero worship of the "Big M".

"With me having a cossin in Detreit, an eye for dry Hull, a boy-friend in Heatrest, an antographed ares of Andy Bathgate, and a special tooth for Beston od beaus, it deem't," was her suspey conchack. How about the Cancilent?

"Now there's a record", she said, her nose deep in the figures. "The Habliants have wen twelve Stanley Caps and fen lengue champlanthy. Sit thuses they have made the deathe littling. They won't take anything this year, but they'll have either the Hawla or the Leafs looking for the aspirin before its over."

"Hey Mabel, how about Abel?" chirped a small voice in the background. "And those Wings — an' Howe?"

She pursed her lips and flicked a stray curl into place. "Cheruh" the smiled, "you may have something there. Record-wise, Detroit rates among the tops. They have won twelve National League championships, and get this, seven of 'em in a row — and seven Stanley Cup finals. And they hold the twin-killing record of

A lone Ranger wanted to know the mark of the Broadway Blues. "The Rangers", the said, "have never made a double-barreled kill. They won the Stanley Cup three times and the league title but once, way back in

A loyal bean-town booster who lives in memories of the recalled that his beloved Bruins won the league title times in a row, from 1927-23 to 1930-31".

"You're right", said the demon statistician", and that's more they won it four times in a row just ten ears later. In fact they won ten league champlonship of only three Stanley Cups and these were double

"Are you forgetting the Black Hawks?" asked a Bobb

The gal rm a finger down a figure list. "No", she said. "The Hawks have yet to win the National League championahlp. They won the Stanley Cup three times, in 1933-34 over Detroit, in 1937-38 over Boston and in 1969-1961 over the Canadienz."

How about the scoring championship?

The feminine yegi smiled and drew a picture from a pocket. She looked at it levinging and murmured, "that's the boy."

We couldn't recognize the guy but our powder room undercover gal told us it wasn't Bathgate, Mikita, Ma-hovolich, Richard, Beliveau, Bucyk or Bobby Hull.

Britain and Italy.

J. M. Hartwick of Wellington, president of the National Dairy Council of Canada, said that most cheese eaten by Canadians is used in snacks and sandwiches. Canadian cheddar is the roast best of cheeses—there is nothing to compare with it if one is going to make a meal of cheese. But if one is just macking, one likes

A small start has been made in offering A small start has been made in offering Canadian-produced copies of cheeses native to other lands. If this trend can be expanded, well and good. If not, then the Canadian cheese industry should work to bring back the day when a hunk of cheese, a few crusty pieces of thick bread and a hearty drink were the ingred-ients of a familiar meal—and by no means the least enjoyable of the day.

The immediate problem, though, seems to The immediate problem, though, seems to be to increase production of first-quality cheese. Hector Arnold, president of the Ontario Cheese Producers Marietting Board, told the meeting here that last year the supply of top quality cheese was only half the amount required for export to the United Kingdom. Increasing cheese production ought to be relatively simple—and much cheaper than are the solutions of most of todays problems. All that would be most of todays problems all that would be formed to the contraction of the co cheese, for which there appears likely to be a

The top 80 percent of high school students get passing marks in their exams, whether they have learned anything or not, according to M. Bruce McSroy, a Toronto high school teacher. Mr. McSroy, hor resigned from Malvern Collegiate in Toronto last year charged recently that teachers have indirect instructions from the Department of Education to pass eight of ten students, and fall the rest, each year.

But is it any worse than a system which we know does exist?

In recent years, teachers at levels below grade 13 have set their own examinations, and marked them themselves. They can thus set an examination, if they choose, to cover only the parts of the course which they have stressed in class. Even if this is not done consclously, teachers will naturally stress both in class and on the examinations the points they consider most important. most important.

In circumstances like this, the results of incompetence may long remain hidden. In some cases a teacher's failure may not show until the student is released on an unsuspecting world and even then it is often the student who will be blamed for the te

It is not fair to the students to expect the teachers to assess their own work. And the system denies the better teachers the recognition they deserve.

PROTECTION WHILE YOU SAVE-UNIQUE ADVANTAGE OF PERMANENT LIFE INSURANCE

Planning for retirement is one area where financial risks have no place. That's why millions of Canadians depend on permanent Life Insurance to provide long term savings for the future as well as protection now.

Permanent Life Insurance values are guarantud. All the amounts are carefully laid out right there in your policy. The amount of the protection is there, the cash values are listed, clearly stating the monetary worth of your savings investment for future years. You can plan on retirement, for example, with absolute certainty that the income promised in your policy will be paid. With permanent Life Insurance there is no guess-work, no speculation. These are safeguards no other long term savings plan can offer.

While a permanent Life Insurance policy is in force its value as loan collateral increases annually, And it can serve you whenever opportunities...or emergencies...arise.

Permanent Life Insurance provides dollars when they are most needed... guaranteed protection for present peace of mind ... and a sure and profitable savings plan for a future that is financially secure.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

British bezing fans haven't had much to rave about world-champies-wise for some time but the ringside 'Arry's and Alfa have memories like the well-known steedowl.

Frinstance they took a poll a little while ago to lect the most popular winner of the Lord Lonsdale Belt and if you're under forty you will never guess who the

He is Jimmy Wilde, the world flyweight champion from 1916 to 1923, who will be 71 years of age in May Wilde pelled a fantastic 1,331 rotes, fire times at many as his nearest riral, Jim Driscoll. The next in line were Randy Turpla. Len Harvey and Ned Tar

The newspaper said that Wilde fought 884 fights with 77 cleas kneckouts and only four defeats. My records say he fought nearly a 1,000 with a half-dozen methacks. He never weighed "eight stone" (112 lbs.) in his fighting life-

They had several names for this plak-thecked Weshs games in his flighting heyday. They called him file "Skeleton from Gunkra's Yard"; "The Hunan Hal-pla"; "The Bilghty Attent," "The Furious Freak"; "The Tylendwan Turre" has most of all "The Ghost With the Hunmer in His Hund."

He married when he was seventeen and his bride be-ne his sparring partner. They used the bedroom for laing quarters.

Jimmy was the scrawnlest in a large family living in Postypridd, a coal mining community and as a schoolbey worked after classes in the mines for "two beb" (fifty cents) a day. Here he met an old fighter Day Dayls.

Wilde got lessons from Dal, sparring deep in a narrow se shaft. Othertimes they boxed in a crowded room at ground. Wilds became a "toughle". At 56 pounds was licking lads who should have sent him home crying.

England at that time had a classic "laboratory" for cers which consisted of booths where the men fought-one three-and-shalf-peur session he knocked out men, rested for half as hour and knocked out four 45 minutes. He was rewarded with a "packet of

In 1818 when American topnotchers were in Lot don for an international service competition. Jimm on successive nights heat Joe Lynch and lost a dis-puted decision to Pal Moore. A year later he bea Moore in 29 rounds. In 1920 he campaigned with soc cess in the United States and this country.

In 1922 came a fantastic offer, \$65,000 to risk his e against Pancho Vills, a fireball from the Phillipines New York.

On retiring Wilde was worth approximately \$250,000. In years that followed unfortunate speculation reduced his holdings drastically. But he began, of all things, to write specia for a newspaper and his blography later get him excellent notices.

Now 71 and plump Wilde's image will go down the halls of time as a fighter, "a laughably small skinny man, with dull eyes and a sad manner, yet, for the perposes of his trade a demon."

What is more, it is difficult to grasp how Japa themselves, (or the Japanese themselves if we must sacrifice neatness and brevity in our one must see the second place and brevity in our we must secribe neatness and brevity in our own language to a foreigner's exageracted sensitive of the second place and the first place it is not even application of the second place, even it inter alphabet. In the second place, even it their alphabet, in the second place, even it their alphabet, our understanding is that it would be Nipponess. The Japs cell their land Nippon, in much the same manner as the Swedec call their country not Sweden but Swerige, if the secreboard shown by the COS in its telecant of the game between Sweden and Canada is to be believed.

Delived.

Things will have come to a pretty pass if we have to start using each country's own designation for itself and its citizens, instead of the traditional English words for them.

Your family's silent partner

Lying there on the doorstep, it can't speak. Or Move. Or Hear. But open it in your hands and it becomes a living, powerful partner in daily living. In the decisions you make, the opinions you form.

It takes you to the highest chambers of government. It takes you to the bloodlest streets of warring countries. It takes you to the heart of history in the making. In short, it tells you what in the world is happening and why.

But people depend on it for needs beyond the need to know. It's where families turn when something's to be bought or sold. It's where hints on health, cooking, religion, amusements, dressmaking, etiquette, marriage are found.

It's where charities first turn for help, and a place where a letter to the editor is published. It's where campaigns are fought and lost dogs are found. It's where criminals are exposed and newlyweds applauded. Where birth and death meet on the same page.

> It's your newspaper, silent partner of the family, yet one that says so much, does so much for so many people - every day without fail.

drive miles and years at the lowest cost

The Rambler American Six is the lowest priced Canadian built car, with features you won't find even on higher priced cars. That's where its real value lies. Because these features keep your operating costs down to an absolute minimum.

There's Deep-Dip rustproofing for example. This process makes the Rambler American the world's most completely rustproofed car. Then there are the three guarantees. The Ceramic-Armoured muffler and tail-pipe are guaranteed for as long as you own the car. And the battery and coolant are unconditionally guaranteed for two years or 24,000 miles.

Another major feature is simply the way the car

is built. With Rambler pioneered Single-Unit construction, the car is stronger, lasts longer. There's our policy, too, of designing every component in a way that will give "maximum usefulness to the user." That's the main reason why the 1963 Rambler was chosen winner of the coveted Motor Trend Magazine "Car of the Year" award,

So when we stress our low price, we're giving you full value for your dollars, Roll on the miles and years with a Rambler American Six, When you start to run out of numbers on the odometer, you'll still have happy memories of the low price you paid. See your Dealer today and run up a few test miles on a Rambler American Six.

Pope Calls Boxing Barbaric

Pope John has called boxing barbaric. His is the latest, and most influential, of many volces raised against boxing because of recent deaths arising from professional bouts, with that of Davey Moore, featherweight champion, being the

The expert gets his hands up faster. But in boxing the fatal injuries occur in bouts staged by professionals who are fighting for the money not for love of the "game."

Furthermore, it would be relatively simple to make boding me the state of these like these boding me the state of the lean militers used in the professional ring, might not be an unmixed blessing—the added weight of the glores would in part direct the effect of the added padding. But coupled with headguards, such as used by boxers in training, bey ought to reduce head injuries. If this reduced the appear of boxing it would merely grove that the swrange boxing fan is just looking for blood—be in not ready interest duties the produce of the part of the state of the part of the Furthermore, it would be relatively simple

Deductions Not Simple

It is often easy to ascertain facts, but not always as simple to draw conclusions from them." A case in point is an Associated Press "brief" from Sydney, Australia.

It is syuney, austraia.

It reported that volunteers collecting bottles to raise funds for the Boy Scouts found that where there were stacks of beer bottles there were no medicine bottles, and where they picked up the most medicine bottles there were no beer

From this the Associated Press drew a con-clusion; it headed this item "Beer is healthy," But is it not possible that those people who bought a lot of beer had no money with which to buy medicine, no matter how much they might need it?

Or that those who have to spend money or a lot of medicine have none left with which to buy beer?

to buy beer?
Or that, while beer does not make one healthy, it is only enjoyed by healthy people?
Those examples ought to make us more cautious in drawing conclusions from other facts, in cases where a wrong conclusion might be even more botherome than with respect to the health-precerving qualities of beer.

Nothing Impossible

it is not impossible to do the same right here

Craze For Security Ends

The Woodstock Sentinel-Review quotes a psychologist as saying that people are worrying less about the future now than was the case in

Perhaps on the whole, they believe th have less future to worry about now," quips the

tinel-Review.

Be that as II may, the very fact that people e worrying less about the future is in itself equate proof that much of our worrying is

For a few years ago, one of the things we rere invited to worry about was that people were worrying too much about the future.

were worrying too much about the future.
The young generation, we were informed, had gone security-mad. When seeking their first jobs, their questions were not about the opportunities for advancement, but about the firm's pension plan and retirement age.

- This obsession with security has been fading for some time now, but it is not until such factor of the control of the contr

Danjone was we use its your eyes. Incre selection, and in any city of comparable size, spring brings a crop of "For Sale" signs on houses all over town. Some of these people are just moving to other homes here; many others are being transferred elsewhere by the firms for which they work. There still remain a goodly number who are pulling up stakes and moving to what appear greener pastures, changing jobs and in a number of cases trying different oc-

choul security, rather than opportunity, is dif-ficult to explain. Some observers limbed it to experiences during the depression, but it seems reasonable to suppose children in their teens during the thirties would be most influenced by the depression, days. They would be seeking jobs as young adults in the forties. The excep-tive stress on security, rather than concornities about security, rather than opportunity, is dif-

jous as young acuits in the forties. The excessive stress on security, rather than opportunity, did not reach a peak until considerably later.

Perhaps, though, the impressions of earliest shilldhood made a deeper mark than most of us shildhood made a deeper mark than most of us would think possible and these early frustra-tions gave rise to the yearning for safety at

U so, that would explain why the pendulum has swung back. Young people now seeking their first permanent jobs grew up during more prosperous years.

Mixed Up

Twenty-six faculty members at the Univer-sity of Alberta have signed a statement condemn-ing a remark by Commissioner C. W. Harvison of the RCMP

"It is the job of the R.C.M.P. to know where subversion is and attack espionage where it is found," said the Commissioner. Surely no perean quarrel with that.,

But he added: "If we think it is found on

university campuses, then we have to go there."

How could subversion and espionage exist on a university campus? Surely, it is the pur-pose of university attendance to consider all conpose of university attendance to consider all con-ceivable bellefs and theories on all conceivable subjects. If this be sübversion, we need another definition of subversion. How can a spy carry on his trade when there are no secrets—and surely it is the whole purpose of a university to reveal rather than to conceal?

If Commissioner Harvison meant that some If Commissioner Harvison means that some students, or faculty members, carry on subver-sion or esplonage off the campus, then let the RCMP investigate these students or faculty

Perhaps, this is the attitude of the faculty

members — but if it is they have done a poor job in publicizing it. Instead of stressing the impossibility of subversion or espionage in a true university, they have stated "a policeman cannot tell whether new thoughts are good or bad." Can anybody? And insofar as anybody can, why should not a policeman be able to do it? Is he necessarily policeman be able to do it? Is he necessarily policeman be able to do it? Is he necessarily policeman be able to do it? Is he necessarily policeman be a university professor, for example? And, finally, since when has it been a mixed meanor, to have "bad"

Listening to the policemen and the faculty mbers, it is difficult to tell who is who, without a program.

wonderful instrument. What is the right protest? President Woodrow Wilson said that no makes how busy he was, he was always willing to find time to see Rabbi Stephen Wise, whenever the latter called for an appointment. Too many people, the President explainted, would come to him to critical or to other suggestions, to the control of a cause which turned out to be nothing else than self-promotion.

Yes, we need to learn self-expression. But first we must sak the deeper question. What tind of a self are we really ex-pressing?

True self-expression is based open the recognition that we re humans and not animals

By GEO. H. CARVER, Sports Editor

Dropped in at a practice of the city Smoke Enters other morning where Fire Chief Gerald Vance's arose were going through their paces preparatory to arrow night's annual Shrine Club police-firemen

Our underground operators haven't been able to dig up much from the limbs-of-the-law camp but the fire-les are of the opinion there could be some skullduggery

There is nothing abort of sheer determination in the Fire Ranger camp. Their theme is "Win this one for Warpy," in deference to and respect for Deputy Fire Cales Gerald "Warpy" O'Brien who is in a Kingston

Besides they haven't forgotten the statement made by Police Inspector Clare Hayes who said some time ago tha his club could whip anything the smoke eaters brought along and that goes for "Warpy" too.

The rivalry is exceptionally keen with the odds vering the fire laddies alightly since they have been eping in some sort of shape by their seasonal activity the City laterdepartmental League.

Three of the Hose and Ladder squad surrounded me is a glint of fire in their eyes and almost first-degreed me is questions regarding the police squad.

"We hear," they cherned, "that they are bringing imports because they haven't get enough players gays who can play good enough to go up against How about that?"

I had to admit I had seen three dark-akinned gentry the city who could be members of the Vist-Nam con-bulary, also two or three gentlemen with pronounced time features who could be with the Akiavik underground-

In serious vein both squads are ready to go, I am told and Vic Hadfield, the New York Rangers star, will be here in the whistle-and-sweater capacity.

The hockey game won't lack for color since the Hast-and Prince Edward Regiment Band in all the glory of an inetrenth century infantry habiliments will be on

And adding their dushes and splankes of color will be the Cumel Herderr's Stable of the Belleville Shrine Clab ha III their desert purpheralls. The benthickered begward bedruped Bodoulus of the Shrine will be on hend to take care of their crippled kiddles proteges as will a large number of femed members of the Shrine.

To avoid the confusion that reigned last year the ticket sales have been left entirely in the hands of the police and first departments. They are not being said at collective outlets, no will they be on asle at the areas tomorrow night. Contact your favorite po-licensal or fireman and he will take care of your needs.

"We man is so tall as when he stoops to help a child," and your contribution, if only the price of a twenty-five cent ticket, will go toward helping some less fortunate child.

For forty years now Shrinedom has been assisting these magniers over North Americas. Seventeen Shrine Hosals, one in Montreal, are evidence of the interest taken the Shriners in these kiddies.

Every cent taken at Shrine funds-raising functions to the special exchequer for these youngsters.

Belleville has done a marrellous job over the years supporting Shrine activities—and President Phil Davis and his committees feel sure a substantial amount will again be raised through the medium of the hockey game for the cause of the crippled kiddies.

RARE, MEDIUM, WELL-DONE

By GEO. H. CARVER, Sports Editor

Vic Haddinkl, the "gentle" Ranger who is stated to releave the Strine-Police-Promes hockey game here de-signed to a "majer game," It says here to Black as dight and has the mean streak of a risherowar. That's yest a by any hall gament cope or mosts only who might get the idea of companying punches with the six foot 175-pound Paradown Risa.

A story from New York may Hadfield is a "poli-" looked upon as the first official tough guy si Funtiasto emigrated to Montreal two summers ago.

Within a week in mid-March, the story goes, Ha-field had finitened Erie Nesterenko in a too-to-toe fi-ficiel, hedly injured Fustinate as a result of a clex hebrycheck, and struggled fisereely with two Bacsmen i on effort to clobber Bobby Roomena.

"Twe always played rough," says the 22-year-ted in penalties in Buffalo and in junior hocke I first became a palicemen when I was 13, playi tam hockey in Oakville, Eve never really be hed. Never knocked down."

"As a kid," he says, "I was a little bigger than the guys so I did a lot of hitting."

He talks about his fights with restreint and under stement. Describing his bouts in Baltimore he eath he d a few, "ten, I guess." He tangled with Vic Cline Springfield and was so intent he sensebed his hand."

"Take Nesterenke," he says. "We west late a see and he put his stick in my face. I told him 'de sgain and you'd better watch your step," He did again and Hadfield employed a technique which tid win the approval of Somy Listen.

He is not all "Right." These who know him my t aff the for he is not! no cotton camby, always in-solud in the other fellow's problems. One mys, "Non 't find a niore gay snywhere."

But sice guys, of course, are not always desirable in the plans of "Red" Sullivan, the Energer coach. Of the Jelyil-Hyde personality of Hadfield, Sullivan pre-fers the less triently Hyde. That's what he wants from the nevent Energer muncleman.

"Vie's type of game is a rough one," says Red. "He'll a good scover when he finds himself. When that pens he'll be good for 15 or 18 goals a year,"

Although he's a forward, Hatfield never has been exceptional softer. His best season with St. Cathes Justices are him collect to B pasts and 50 anistra: at Buffale he secred only five goals in 53 games had assaged tree goals in 53 games until recently in he secred his first hat trick against Besten.

Shortly after Sullivan became the Ranger coach haught Hadfield up from Baltimore. "You play the same ne here as you did there and I'll be salisfied," he told a. He was inserted on the line with Andy Bethguis I Don McKenney, but a fin attached weakened him.

"My weight dropped to 171," Hadfield said. "Wi re that low you don't go after the 200 pounds, after a while, I figured I couldn't walt any long I started hitting again.

Microid and the father of Michelle, 1th years and c, air months, Vie hit the heatilines after his col-ice with Funtimes of the Mannelle Force. It was the night of March 9th. Madfield, who had lengthed it Funtimes certific in the measure, were like the ner after the pack. The Chandless' defuncement and to me Vie out of the corner of his eye and carrel to duck at the last minute.

"I was right on top of the play," Banger defencements Harvey said. "It was a clean play all the way. No stion about that."

Gale-breaker!

The look is this year's stylish "denim" but the resemblance to denim ends right there. Our new windbreaker is made from a closely woven mixture of miracle Dacron and Cotton, Laminated to a thin layer of air-foam insulation it is so wind and weather resistant that we call it a gale-breaker. Created exclusively for Tip Top Tailors in mist grey and chambray blue. The features include half ragian sleeves, vertical slash pockets, stand-up collar, back waistband, and a \$16.95 price tag. Majority Govt.

OTTAWA (CP) — Dr. J. A. Corry, principal of Queen's Uni-versity, said Thursday night that Canada is unlikely to have a majority government in the

"mood of disenchantment and frustration.
Voters were losing confidence in the political process because their influence was dwindling steadily in an age of big gov-ernments and big organizations. A sense of purpose was lecking. Government actions affected individuals personally in many ways, but at the same time gov-

leaders, higher civil servanis and spokemen for rightly or ganized interests."

Dr. Corry said "the main lope" is a situation where government is controlled by a majority party, which in turn is mituenced by several hig organizations. But he added:

"In this country at least, the hanging conditions of politics are the price of the country at least, the said country at least the said country at l

Coalitions

As election day nears, many Canadians are urful that no party will obtain an overall ma-tity of the 265 seats in the House of Commons. is, they are convinced, would be bed news for a country.

The leaders of the major parties, Prime inister Diefenbaker and Lester Fearson, have, of ourse, been using this fear in an effort to pry the fear in an effort to pry the fear in an effort to pry the fear in a fear in an effort to pry the fear "milinter" parties, the Source, been using this fear in an effort to pry voters sway from the two "spillers" parties, the New Democrats and the Social Credit. In a bid to offset these efforts, both T. C. Douglas of the New Democrats, and Robert Thompson, Socred leader, have pleiged themsieve to co-perate with whatever party gains the largest number of seals, in the pleasage that the property of log stable government.

ling stable government.

Sometimes political, issues are cut out of
whole cloth, fashioned with no more at stake
than the gathering of votes. Now, however,
come reports which, if true, would indicate that
at least one of the party leader, Leater Fersmon,
is genuinely concerned nodely government would
have on the nation. Mr. Fersmon denies the
reports but they still provide interesting grounds
for speculation.

reports but keys one permanents of the special state.

According to these reports, at an informal press reception at Montreal some time ago, Mr. Peearson was asked what he thought, could, would or should happen if neither the Liberala not the Conservatives won a clear majority of the

Seats.

He is reported to have suggested a Liberal-Conservative coalition, with the present party leaders, Mr. Diefenbaker and himself, retiring in order to give the coalition the greatest chance

of success.

The Toronto Telegram denounces talk of such a coalition as "nonsense." It could, it maintains, mean the death of one of the did parties, to the benefit of one of the "splinter parties which would swell to fill the voil either by the absence of both old parties from the Option of the parties when we have the parties which would swell to fill the voil either by the absence of both old parties from the Option of the Option of the Parties from the Option of the Option o

position.

The Telegram reviews the histories of past scalitions in Canadian politics, Federal and provincial, to substantiate in claims. It has a point. But what are the alternatives?

Continued minority government is undestrative.

Continued minority government is undeed:

Mat other feasible coalitions there might
be will not be known until the strength of the
different parties in the minority of the continued of the
different parties in the continued of the continued of the
mattions. One of these would be a Conservative-Liberal coalition, aiready mentioned. An
other, a New Democratic-Scored coalition, can be
ruied out. This leaves four possible groupings.
It is inconservative-NDPs.
It is not of the Conservative-NDPs.
It is not the Conservative-NDPs.
It

the nuclear arms issue rules this out—the Libraria have come out for the acceptance of nuclear warheads for the Bomare, to fulfill what they regard as the malfor's commitment to do so, while the NDP is opposed to Canada accepting nuclear arms under any conditions.

There remains a Conservative-NDP coal-

clear arms inher any conditions.

There remains a Conservative-NDP coalition.

Though these two parties appear to be strange bediclows, on examination they have some points in common at present. Since Hon.

Howard Green, Minister of Katernal Affairs, has carried the day, on the nuclear arms issue, little separates the two parties in the field of defence policies. Prime Minister Dietembaker has been talking about a Bay Stered compitation and the strand Dietembaker Governation of the Control of the

Liberals.

In of these alternatives speed to Candian voters, they have a remedy. They che do all in their power to assure that one of the major parties has a clear-cut majority after the April 8 election.

There are impressive indications today that these are the things Canadians do feel starved of. Not pie in the sky or pie on a plate but the dignity of a national character that reflects courage and resolve. This is what Liberal leader Lester B. Pearson is offering the voters he talks to in the opening stages of the federal election campaign. In doing so he is showing courage and, yes, just plain guts."—Toronto Telegram

"Mr. Pearson is following the honest course of not trying to bribe the electorate with promises to spend vast sums of their own money. It takes courage, when the highest elective office is within his grasp, to follow that course. That he has the fortitude to do so is evidence he possesses qualities of courageous leadership which the nation arrely needs."-Regina Leader-Post

On this basis, the most complete team seems to be the Liberals, Mr. Pearson has already held an important ministry with success. He is surrounded by a number of men with a feeling for public affairs, realistic ideas and administrative experience."-Le Devoir

Mr. Pearson makes it plain

"Mr. Pearson has made it plain that he has no intention of getting down into the gutter with Mr. Douglas or, for that matter, with Mr. Diefenbaker, whose attacks on the Liberal leader have been equally despicable. But the campaign of mud-slinging goes on. In the end, the result will be a serious loss of respect for the NDP among people who have felt this party stood for honour in politics."-Ottawa Citizen

"Mr. Pearson mentioned as first on the list of Liberal welfare priorities the establishment of a contributory pension plan for Canadians, Then would come a national health plan: but first the economy must be expanded to the point where the national economy could pay for such measures without going further into debt. He added that the government should spend not a nickel on anything that would not increase production and reduce unemployment."-Winnipeg Free Press

"Once upon a time it was common to accuse politicians of talking one way in Quebec and the other way in English Canada. It is noteworthy that Liberal leader Pearson has left Quebec in no doubt as to his nuclear weap-ons stand."—Vancouver Sun

By GEO. H. CARVER, Sports Editor

"Reminiscing is said to be a sign of old age—but with age is supposed to come wisdom."

That came from a man who has grown wise with years, a man who was prominent in sports in this not too long ago and was intrumental in develop-some of Jis finer stilled.

If, as he said, reminiscing is a sign of old age, then a few of us who were watching some-of-the city athletes of two decades, ago try to recapture some of their finer mo-ments, are ready for the figurative "honeyard."

"Toots" Holway, and the majority of the fine junior hockey feam he coached in the early forties, were going through their "eleventh reunion" paces. Time has taken its toll perhaps in a physical sense. Hairlines and waistillnes were vastly different to those of the early

But over the "wheening, creaking and squeaking came sounds born of the unfailing spirit of comrade ship that has bound these former hockey players wit a bond that Time has failed to weaken or break.

Those of us on the sidelines were content with iniscing". The years rolled back. The flashing of hockey youth in its heyday took the place of the moving ones on the ice. It meant much to the n

"Looking back," he said, 'I now see men when at that time I saw only boys. A number of those boys are out there now. It is very pleasant for me to see the type of men they have become; good sports; good friends, and good citizens."

We talked of various phases of sport. Then came his orite, or one of his favorite athletic topics, football, mind went back two decades.

His voice was Jaw. He talked as those, the flor young men of his cris were parading in front of him. The heaf foothil from we had in those days, scholastic-ally, he said, played in the 1943 season for St. Michaely, all cannifer them the best group collectively that we had. To cannifer them the best group collectively that we had. To consider them the best group collectively made we had to CoSGA changinghinghing. They were a great class.

the COSSA championship. They were a great cish."

He wared a hand in the distriction of the Ice.

"Seen of them are set there new," he said. "Saied code
standing on that Thin Cish were District Playstrict, the
quarterback; D. Green and D. Adams, centrer; E. Thomas
and G. Willow, great?; F. McCouley, R. Temple and E.

Thomas, tackets, Don Barrett and J. Walers cods. The
heaks were Gerry Mohey, Forrester, R. Wilson, B.

Mengher, B. McQuaid and Donoran."

Years have not dimmed his pride. In a few moments perhaps be lived some of the great games of the past. "The whole team," he said slowly, "played in such a way that any coach would have been proud just to watch them in action."

"Gary became the most outstanding. He had com-a sense with natural ability and being given the op-unity to play under professional conditions, he became success he is today."

"I would be amiss," he said, 'if I did not mention some of the fine youngsters who proved such worthy; opponents to these boys. Whether hocker, basehali, or football they played hard, but clean as sportsmen should. Such grand staletes as Rollins, Yorke, Day, Holway, Bishop and many others.

"The proof of the respect these players had for each other—they combined to play organized sport which brought Ontario titles to their city."

He was quiet for a moment or two. Then he straightened to his full height and smiled. "Reminiscing may be a sign of old age," he said, "but, you know, it is rather empyable, too."

It's impossible to hang a price tag on this bottle of blood. Fortunately, in this country, so one ever does. Your Caradian Red Cross provides whole blood and blood products absolutely free to almost 30,000 victims of illness, accident and disaster every year. All that's ever asked is your support. Your Red Cross needs your help to help save lives. Give generously when the Volunteer Red Cross Canvasier calls at your door.
